

22nd August, 2015

Workshop on Research Oriented Education -Advanced Excel for the Faculty

A training on excel sheet was conducted for the faculty of MAIMS on 22nd August, 2015 at the institute by Mr.Amit Aggarwal, an expert in the area of research tools, techniques, Financial Modeling etc. This training was participated by thirty faculties with different

specialisation from the institute like IT, Finance, Marketing and HR. The training started with the basic use of excel sheet for analyzing a huge data and it was practiced with the live examples at the same time. The faculty also learnt how to make a model for analyzing rate of interest on loan for different periods, model for pension schemes etc. The trainer put special emphasis on strengthening teaching pedagogy and research methodology, for enhancing their research orientation as well as for preparing all types of students for their project work and analyzing its data for better analysis of work. This will further improve the overall conversion ratio in the placements as well.

The said training will be followed by another three rounds of session in order to identify the gaps in the learning process and to improve the implementation of such activities in regular exercises.
