Last Date of Registration: 3rd August 2019

INTRODUCTION

Department of Law, MAIMS has taken dedicated efforts to ensure that the students are fully equipped to face the challenges of beginning a career in the field of Law. A well balanced curriculum has been designed by the Guru Gobind Singh Indraprastha University regarding the integrated five year BALLB course. There is a need to familiarize the students with the vast field of BA as well as LLB. Students come from the streams of Science, Commerce or Humanities at the level of Class 12th.

Keeping this in mind, the Value-Added Course is framed by the Department of Law, MAIMS to familiarize the students with the concepts of Copyright, Trade mark, Patent, Plant Variety and Farmers Rights Act, 2001. This VAC is really helpful to sensitize and develop a sense of entrepreneurship in the students. In today's challenging environment, education has an important role to play. Research shows that the skills like team work, time management, continuous learning and independent studying capabilities are more essential for the success of students in higher education in universities. Bridging the gap of students and creating transition from pre-university to first year university education is challenging and has impact on their retention in the course. Its key focus is orientation, critical thinking, self-awareness, social awareness, career preparation, social responsibility and interpersonal skills.

Through this students are prepared for advanced education. Usually, it is found that the syllabus of each subject at graduation level is wider than the subject at Senior Secondary level. So in order to make them self dependant, the Dept. of Law has taken an initiative to organised a VAC on IP Skills where the participants will be trained to face the technology and and accept the upcoming issues ion the field of innovation.

This is a maiden initiative by the department to bridge the innovation and skills in order to develop entrepreneurship among students. Also to provide a hand training to faculties.

Keeping this in view, Course material and Lesson plans are designed exclusively for the students of all streams from 12th August, 2019 i.e., Monday. The Course will help them to learn new perspectives of IPR law which is very important for their career.

OBJECTIVES and Learning OUTCOMES

To introduce fundamental aspects of Intellectual property Rights to students who are going to play a major role in the development and management of innovative projects in academics or industries.

To equip the students with the knowledge and confidence needed to take on bigger challenges in IP-related fields.

Learning Outcomes

The students once they complete their academic projects, they get awareness of acquiring the patent and copyright for their innovative works
