REPORT

Excel is the most effective tool for managing and analyzing data of all kinds. Its increasing use in several management functional areas is generally recognized. This dynamic tool provides several options for not only making the task easier, but also for improving the sophistication of data reporting and analysis. Its numerous advantages motivate IT faculty at MAIMS to create a certificate course on Business Applications of MS Excel- Intermediate for our students benefit.

This Certificate Course was the initiative taken for undergraduate students. The prime objective of the course was to introduce students to basic commands, useful functions, and capabilities of Microsoft Excel used in business. The course focused on in-depth Excel courses, including how to use various Excel formulas, tables, and charts to manage small to large-scale corporate processes. Each Microsoft Excel training session emphasized time-saving tactics, as well as discovering previously "programmer-only" capabilities. Along with this practical and usable training, students also learnt how to integrate their work within the Office “family” for achieving greater results.

A batch of students were formed to provide them more attention for each session. It was the 30 hours training program. The course was divided into 7 sessions and each session was taken by different faculty members. Each session comprised of 3 classes and 7 feedback forms were filled by students. At the end of each session there was an assignment to assess the understanding level of the students. And there were two quizzes conducted one in the middle of the course and secondly, after completion of all sessions a final quiz was conducted.

It was a great learning experience for the students as well as for the faculty. Certificates were given only to such students who successfully qualified all the four parameters namely, Attendance, feedback forms, Assignments and Quizzes. Total 120 students across the country have registered for this course and have qualified all the above stated parameters.
