#### **POLICY FOR ENVIRONMENT INITIATIVES**

Environment Policy is very pertinent in recent times of rising environmental concerns in the world. Recognizing this responsibility, Maharaja Agrasen Institute of Management Studies (MAIMS) is going to adopt the following 'Policy for Environment Initiatives':

1. To organize tree plantation drives regularly with the help of students and faculty members in order to make the campus green and beautiful.
2. To maintain lush green lawns with variety of medicinal and seasonal flowers blooming across the campus.
3. To adopt DDA Green belt and maintain the same.
4. To have restricted entry of vehicles to curb pollution.
5. To promote use of electric vehicles by installing electric charging station.
6. To reduce, reuse and recycle the waste material through waste management practices like using composting pit, etc.
7. Maximize water usage efficiency. Establish waste water treatment and recycling system.
8. To use rain water harvesting system, using water collected for gardening and other purposes.
9. To use RO waste water for cleaning floors, gardening and other miscellaneous works.
10. To promote environmental friendly and sustainable initiatives in all development plans.
11. To reduce carbon footprint.
12. To avoid use of single use plastic.
13. To organise environment awareness campaigns in and beyond the campus regularly for students, faculty, staff and community.

#### **POLICY FOR**

#### **ENERGY USAGE**

Maharaja Agrasen Institute of Management Studies is committed to proper implementation and efficient utilization of renewable energy sources in such a systematic way so as to minimize its impact on the environment. An alternative energy source offers the opportunities for student's community to engage in initiatives for contributing to environmental protection.

Maharaja Agrasen Institute of Management Studies has undertaken to implement following provisions to conserve energy in the campus:

1. To use and install alternate sources of energy like solar panels for energy conservation.
2. Reduction of energy usage by using LED bulbs, lights, etc.
3. Reduction of energy usage by using energy efficient electronics.
4. To avoid wastage of energy; switching off lights, fans, ACs, etc when not in use.
5. To create awareness about energy conservation among students, staff and faculty.
6. To minimize the use of electricity by responsible energy consumption.
