Ms Excel- 1.0

February-May 2021

Report

Topic: Ms. Excel 1.0 (Skill Enhancement Certificate Course)

Date: 14th September 2020-8^h December 2020

Time: 3:00 PM to 4:30 PM

Venue: GMeet

Excel is the most effective tool for managing and analyzing data of all kinds. Its increasing use in several management functional areas is generally recognized. This dynamic tool provides several options for not only making the task easier, but also for improving the sophistication of data reporting and analysis. Its numerous advantages motivate IT faculty at MAIMS to create a certificate course on Business Applications of MS Excel 1.0-Basics for our students benefit. The Course was conducted on G-meet Platform.

This Certificate Course was the initiative taken under the aegis of IQAC for undergraduate students. The prime objective of the course was to introduce students to basic commands, useful functions, and capabilities of Microsoft Excel used in business. The course focused on in-depth Excel courses, including how to use various Excel formulas, tables, and charts to manage small to large-scale corporate processes. Each Microsoft Excel training session emphasized time-saving tactics, as well as discovering previously "programmer-only" capabilities. Along with this practical and usable training, students also learnt how to integrate their work within the Office "family" for achieving greater results.

Two batches of students were formed to provide them more attention for each session. The course was divided into 3 sessions and each session was taken by different faculty members. Each session comprised of 10 classes and 3 feedback forms were filled by students. At the end of each session there was a quiz to assess the understanding level of the students. And, after completion of all sessions a combined final quiz was conducted from all sessions.

It was a great learning experience for the students as well as for the faculty. In Group One, Session 1 was taken by Ms. Kamna Vaid, Session 2 by Ms. Neetu Agarwal and Session 3 by Dr. Sushila Gupta. Similarly, in Group Two, Session 1 was taken by Dr. Sangeeta Rawal, Session 2 by Ms. Shruti Sharma and Session 3 by Dr. Geetanjali Gupta. Certificates were given only to such students who successfully qualified all the four parameters, namely, attendance, feedback

forms, assignments and Quizzes. Total 151 students across the country have registered for this course and it is worth mentioning that 61 students have qualified all the above stated parameters.

Such programs always give an edge to the students when it comes to working in the corporate world. Knowledge of excel has become the essential part of every business and job. The credit for this ambitious initiative goes to Prof. (Dr.) Ravi Gupta, Director, MAIMS and Dr. Vijay Khurana (HOD, Business Administration) and his team. Their constant support and encouragement helped in successful accomplishment of this program.

Data Analytics is the need of an hour. In this dynamic & ever-changing environment, predicting the future has become more relevant, especially with the availability of enormous amount of data. Excel & SPSS (Statistical Package for Social Sciences) are the prominent tools in data analytics. They help generating meaningful results from the data by the application of various statistical methods with ease. Many companies have now been looking for a skilled professional, who understand the research methodology, statistical techniques, data presentation & working on statistical software. Thus, it encouraged the seasoned faculty of MAIMS to design a skill enhancement course in data analytics using Excel & SPSS for final year students. The Add on was conducted on G-meet Platform.

This Certification Course was the initiative taken under the aegis of IQAC in association with Think Quest Club for students of MAIMS. The prime objective of the course was to equip the students with the basics of research methodology & various quantitative data analysis techniques. Excel & SPSS had been used to conduct various statistical tests and make an inference about the data. Specifically, the course covered in-depth lessons for advance excel commands, formulas, charts/plots followed by descriptive analysis, parametric & nonparametric tests, correlation, regression, normality and factor analysis. A total of 177 students enrolled in the course. The course was conducted in two batches. The course was of 30 hours, divided in 20 sessions of one & half hour each. Every session was followed with a practical assignment related to it. After the completion of the week (2 sessions), a feedback form was floated to get the viewpoint of the

students. A total of 10 such feedback forms were filled by the students. The students were assessed based on the assignment submitted, MCQ test on Excel and MCQ test on SPSS.

It was a great learning experience for the students as well as for the faculty. The sessions were conducted by Prof. (Dr.) Vijay Kumar Khurana, Dr. Parul Kumar, Dr. Bharti Chaudhary, Dr. Sumedha Dutta, Ms. Shilpee Aggarwal, Ms. Preeti Bansal, Mr. Inderpal Singh, and Mr. Nakul Anand. Certificates were given only to such students who successfully qualified all the four parameters, namely, attendance, feedback forms, assignments, and quizzes. The credit for this ambitious initiative goes to Prof. Vijay Kr. Khurana (HOD, Business Administration) & his team, who worked under the able guidance of the Prof. Ravi Kumar Gupta. Director MAIMS. Their constant support and encouragement helped in successful accomplishment of this program. The valedictory session of the certificate course was held on 22nd June 2021 and qualifying students were felicitated.

Convener –Dr. Parul Kumar, Senior Assistant Professor

About the Course

Courses on research methodology are often well packed with methods and techniques of data analyses, ‘but’ with limited understanding of the logic underlying the various techniques, methods, and research design. Keeping this challenge in mind, the present course has been designed for students who keen to do research & data analysis in the years to come. The students will learn how data analysts describe, predict, and make informed business decisions in the specific areas of marketing, human resources, finance, and operations. Analytics talent demand is much more than the available skilled supply. The students would be able to become employable in this fast-growing new age field by demonstrating the skills learnt through this course.

Excel & SPSS had been used to conduct various statistical tests and make an inference about the data. Specifically, the course covered in-depth lessons for advance excel commands, formulas, charts/plots followed by descriptive analysis, parametric & nonparametric tests, correlation, regression, normality, and factor analysis. Many companies have now been looking for a skilled professional, who understand the research methodology, statistical techniques, data presentation & working on statistical software. Thus, this course would build the data analysis skills among the students.

Objectives of the Course:

- Application of Research Methodology
- Understanding of different types of data
- Able to describe, predict & make informed decisions
- Application in the specific areas of marketing, human resources, finance, and operations. Quantitative Data Analysis

Course Outcomes:

- Students will be able to analyze and work with large data sets and make meaningful interpretations.
- Students will also be able apply correct statistical tests on different types of data Students will be able to add value to their research projects.
- With advance knowledge of Excel & SPSS, they can easily start their careers as research analyst or data analyst.
