Name of Event: Session on "Data Management & Responsible AI: Data Ethics & Governance"

Organized By: Prof. Manju Gupta, HOD, Dr. Anil Kumar Goyal, Associate Professor, Department of Commerce

Date of the Event: 9th October 2025

Time of the Event: 11 AM onwards

Venue: Room No. 984, 8th Floor, Block 9

Number of Students Registered: 103

SESSION ON

“Data Management & Responsible AI: Data Ethics & Governance”

The Department of Commerce, MAIMS, organized an insightful and interactive expert session on the topic “Data Management & Responsible AI: Data Ethics & Governance” for the students of B. Com (Hons.) on 9th October, 2025. The session aimed to provide students with an in-depth understanding of the management of data in the age of artificial intelligence and handling ethical issues.

The initiative was part of the department’s continuous efforts to bridge the gap between academic learning and real-world financial practices, enabling students to stay abreast of contemporary trends shaping the financial ecosystem.

In a world overflowing with information, data has become more than just numbers on a screen — it is the language of decisions, the backbone of businesses, and the foundation of progress. The way organizations harness, interpret, and govern data today determines how effectively they will lead tomorrow. And it is in this ever-evolving landscape that data stewardship plays a vital role — ensuring not only the accuracy of data but also its integrity, compliance, and ethical use. The session aims to help us understand how this invisible yet powerful domain drives the world’s largest enterprises and shapes the digital future.

This session aims to help students in:

1. Exploring how Artificial Intelligence is transforming Data Management.
2. Gaining insights into Ethical and Governance issue in the age of AI.

The session was conducted by Mr. Gaurav Malhotra, Associate, Data Stewardship at BlackRock — one of the world’s most renowned and trusted names in global asset management.

Mr. Malhotra is a dynamic and result-driven Data Steward with over six years of experience spanning Data Products, Business Analytics, Content, and Governance. He brings with him a unique blend of technical expertise and strategic thinking, underpinned by a solid foundation in Finance and Research.

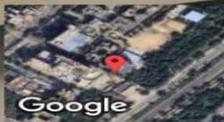

At BlackRock, Mr. Malhotra plays a key role in ensuring data governance, compliance, and process optimization at a global scale. In an organization that manages trillions of dollars in assets, his work directly supports the integrity and efficiency of data systems that inform financial strategies worldwide.

But beyond his role, what sets Mr. Malhotra apart is his passion for leveraging Generative AI and emerging technologies to enhance data-driven decision-making. He believes that the true power of data lies not just in its quantity, but in the intelligence and creativity with which it is used — to innovate, to optimize, and to create impact.

The session witnessed active participation from B.Com (Hons.) students across all semesters. Students raised several queries related to data management and ethical issues in management and governance in the age of artificial intelligence and the future scope commerce graduates in the same field. The interactive Q&A segment further enriched the session, providing clarity on industry expectations and future career paths.

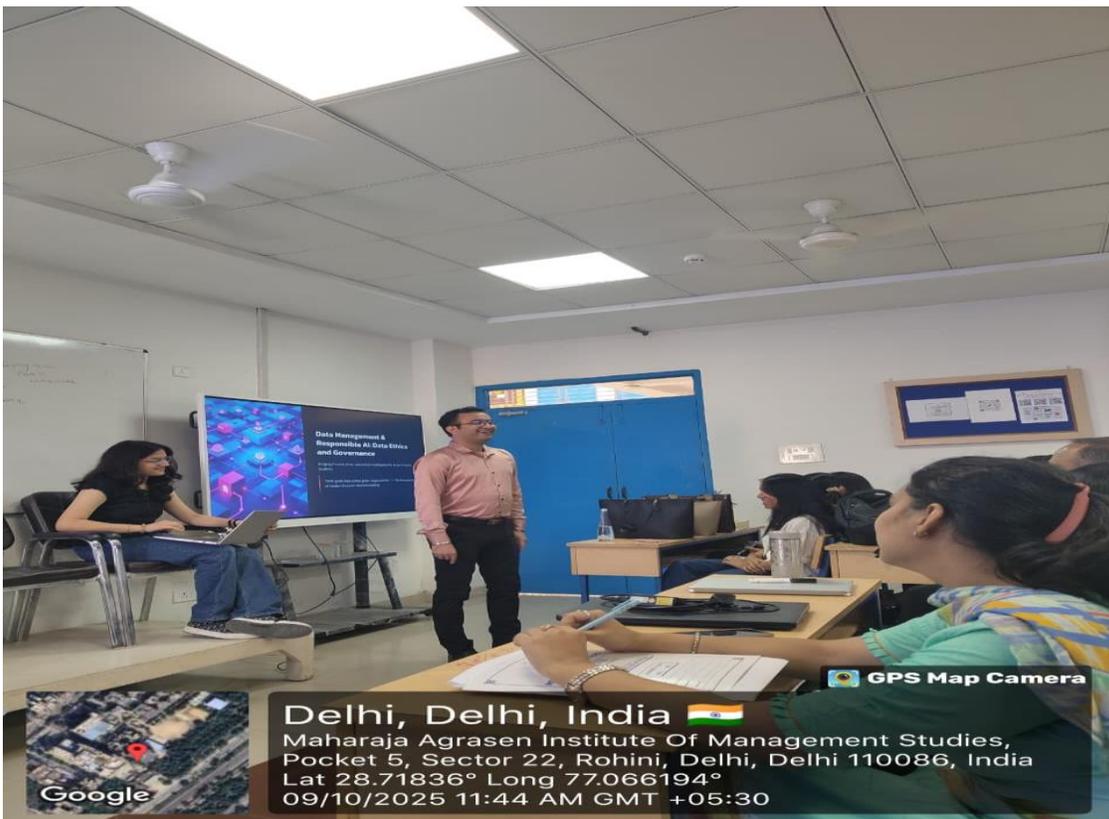

The session on “Data Management & Responsible AI: Data Ethics & Governance” proved to be highly informative and thought-provoking. It offered students a comprehensive view of how technology is transforming the way the things happening in present era. The Department of Commerce extends its gratitude to the resource person for their valuable insights and looks forward to conducting more such enriching sessions that prepare students for the dynamic financial landscape ahead.
