Navigating Inner Transformation: Challenges and Insights from the *Aatmachintan* Radio Series on Self-Discovery and Social Harmony

- **Ms. Priyanka Oberoi**

Abstract

This paper explores the intricate relationship between inner self-awareness and the challenges of personal transformation, as examined in a community radio series titled *Aatmachintan*, broadcast by JIMS Vasant Kunj. The series, led by Brahmakumar Anuj and Brahmakumari Ekta, delves into the profound process of self-discovery, addressing the existential questions and psychological barriers individuals encounter while striving to understand their true nature. The discussions highlight the significance of meditation, value-based introspection, and spiritual guidance as tools for fostering inner harmony and personal growth.

The research presented in this paper is contextualized within the broader theme of ecological and social harmony, underscoring the role of self-awareness in achieving collective well-being. By analyzing the insights shared in the *Aatmachintan* series, the paper identifies common challenges faced by individuals in the journey of self-realization, including the confrontation with deep-seated fears, societal conditioning, and the struggle to align one's actions with inner values.

Through this analysis, the paper contributes to the discourse on the interconnectedness of personal transformation and community well-being, proposing that inner self-awareness is a foundational element for fostering ecological and social harmony. The findings suggest that programs like *Aatmachintan* can serve as valuable platforms for promoting introspection and spiritual growth, ultimately leading to a more conscious and harmonious society.

Key Words: Inner Self-Awareness, Self-Discovery, Community Radio, Value-Based Introspection, Spiritual Growth

Introduction:

The pursuit of self-awareness and personal transformation has been a central theme in various philosophical, psychological, and spiritual traditions across cultures. In contemporary society, where rapid technological advancements and social changes often lead to increased stress, anxiety, and a sense of disconnection, the quest for inner peace and harmony has gained renewed significance. The "Aatmachintan" radio series, broadcast by JIMS Vasant Kunj, is a unique community initiative that delves into the profound process of self-discovery, addressing the

existential questions and psychological barriers individuals encounter while striving to understand their true nature.

Led by spiritual guides Brahmakumar Anuj and Brahmakumari Ekta, the "Aatmachintan" series provides a platform for introspective dialogue and spiritual exploration. It offers insights into the challenges of inner transformation and the tools needed to achieve personal growth and social harmony. The series draws from ancient spiritual wisdom, particularly the teachings of the "Shrimad Bhagavad Gita," to explore various stages of *yog* (yoga), the principles of karma, and the role of divine guidance in fostering self-awareness. Through discussions on meditation, value-based introspection, and spiritual wellness, the series highlights the significance of integrating spiritual practices into daily life to overcome deep-seated fears, societal conditioning, and internal conflicts.

This paper seeks to explore the themes presented in the "Aatmachintan" series and their relevance to the broader discourse on mental health, emotional and spiritual wellness, and societal harmony. It aims to identify common challenges faced by individuals on the path of self-realization, such as the struggle to align one's actions with inner values and the confrontation with deep-rooted psychological barriers. By analyzing the insights shared in the series, the paper argues that inner self-awareness is not only crucial for personal well-being but also foundational for fostering ecological and social harmony.

The significance of this research lies in its potential to contribute to the understanding of how spiritual practices and self-awareness can influence collective well-being. By promoting introspection and spiritual growth, programs like "Aatmachintan" serve as valuable platforms for cultivating a more conscious and harmonious society. The interconnectedness of personal transformation and community well-being underscores the need for deeper engagement with spiritual and ethical practices that foster inner peace and social cohesion.

This paper is structured as follows: First, it provides a literature review that contextualizes the concepts of mental health, *yog*, emotional and spiritual wellness, motivation, self-awareness, and the roles of God and karma. Next, the research methodology outlines the qualitative and thematic analysis approach used to analyze the content of the "Aatmachintan" series. The findings section

presents the key themes identified from the series and discusses their implications for personal and societal transformation. Finally, the paper concludes by highlighting the potential of introspective and spiritual practices to contribute to both individual and collective harmony, and suggests areas for future research.

Review of Literature:

The literature review explores the foundational concepts underlying the themes of the "Aatmachintan" radio series, focusing on self-discovery, spiritual growth, and societal harmony. It discusses the theoretical frameworks and empirical studies related to mental health, yog (yoga), emotional and spiritual wellness, motivation, self-awareness, the role of God, the principle of karma, and health awareness. This review provides a comprehensive backdrop for understanding the intricate relationship between inner transformation and its broader social implications.

1. Mental Health:

Mental health is defined as a state of well-being in which an individual realizes their potential, copes effectively with the normal stresses of life, works productively, and contributes to their community (World Health Organization, 2001). It encompasses emotional, psychological, and social well-being, affecting how individuals think, feel, and act. In the context of the "Aatmachintan" series, mental health is seen as a crucial starting point for self-discovery and transformation. Challenges such as anxiety, depression, and stress often serve as barriers to inner peace, making it necessary for individuals to engage in practices that enhance self-awareness and emotional regulation.

Several studies have emphasized the importance of self-reflection and mindfulness-based practices in improving mental health outcomes (Kabat-Zinn, 2003). Programs like "Aatmachintan" promote mental health by encouraging listeners to engage in introspective practices that foster a deeper understanding of their mental and emotional states.

2. Yog (Yoga):

Yoga, or 'Yog,' is an ancient Indian practice rooted in spiritual, mental, and physical disciplines. According to the "Aatmachintan" series, yog is not merely a physical exercise but a holistic approach to achieving self-realization and inner harmony. The "Shrimad Bhagavad Gita"

outlines various stages of yog, such as *Karma Yog* (the yoga of action), *Bhakti Yog* (the yoga of devotion), *Jnana Yog* (the yoga of knowledge), and *Dhyana Yog* (the yoga of meditation). These stages guide an individual's journey toward spiritual growth and enlightenment by promoting ethical conduct, devotion, wisdom, and meditation.

Research has highlighted the benefits of yog practices in enhancing emotional and spiritual well-being, stress reduction, and overall health (Telles et al., 2015). Yog also plays a significant role in cultivating self-discipline and resilience, which are essential for overcoming the psychological barriers discussed in the "Aatmachintan" series.

3. Stages of Yog According to Shrimad Bhagavad Gita

The "Shrimad Bhagavad Gita," a key spiritual text, outlines several stages of yog that guide practitioners on the path to self-realization:

- **Karma Yog (Yoga of Action):** Involves performing one's duties without attachment to the results, emphasizing selfless action.
- **Bhakti Yog (Yoga of Devotion):** Focuses on developing a deep, emotional connection with the divine through love, devotion, and surrender.
- **Jnana Yog (Yoga of Knowledge):** Centers around the pursuit of wisdom and knowledge to discern the nature of reality and self.
- **Dhyana Yog (Yoga of Meditation):** Involves deep meditation and mindfulness to attain self-awareness and unity with the divine.

Each stage addresses different aspects of spiritual development and self-awareness, providing a comprehensive framework for personal transformation. The "Aatmachintan" series emphasizes these stages as a roadmap for individuals seeking to overcome mental and emotional obstacles on their path to self-realization.

4. Emotional Wellness:

Emotional wellness refers to the ability to understand and manage one's emotions effectively, fostering a sense of inner peace and balance. It involves recognizing emotions, coping with stress, and maintaining positive relationships. Emotional wellness is a key theme in the "Aatmachintan" series, which advocates for practices like mindfulness, meditation, and value-based introspection as tools for achieving emotional balance.

Studies have shown that emotional wellness is linked to better mental health, reduced stress, and

enhanced life satisfaction (Diener et al., 1999). Programs like "Aatmachintan" provide a platform for individuals to explore their emotional landscapes, identify challenges, and develop strategies to achieve emotional wellness.

5. Spiritual Wellness:

Spiritual wellness involves seeking meaning and purpose in life, often through a connection with something greater than oneself. It includes the exploration of one's beliefs, values, and purpose, contributing to overall well-being. The "Aatmachintan" series, led by spiritual guides Brahmakumar Anuj and Brahmakumari Ekta, emphasizes the role of spiritual practices like meditation and prayer in achieving spiritual wellness.

Research indicates that spiritual wellness can lead to enhanced emotional resilience, lower levels of anxiety and depression, and greater life satisfaction (Koenig et al., 2001). The insights shared in the "Aatmachintan" series suggest that spiritual wellness is a cornerstone of personal transformation and social harmony.

6. Motivation:

Motivation plays a critical role in the journey of self-discovery and personal growth. It is the driving force that propels individuals to pursue goals, overcome challenges, and achieve inner transformation. In the context of the "Aatmachintan" series, motivation is seen as essential for maintaining consistent spiritual practices and aligning one's actions with inner values.

Self-Determination Theory (Deci & Ryan, 2000) posits that intrinsic motivation, driven by personal growth and self-fulfillment, is more sustainable and effective than extrinsic motivation. The series encourages listeners to cultivate intrinsic motivation through self-awareness, reflection, and alignment with higher spiritual goals.

7. What is Self?

The concept of 'self' is central to the "Aatmachintan" series, which explores the nature of the true self beyond the ego and superficial identities. The self is often described as the core essence of an individual, encompassing their consciousness, values, and spiritual identity. Philosophical and psychological perspectives on the self emphasize the importance of self-awareness in personal growth and fulfillment (Rogers, 1961).

The series delves into existential questions such as "Who am I?" and "What is my purpose?"—questions that are fundamental to the process of self-discovery and transformation.

8. Role of God:

The role of God in the process of self-discovery and transformation is a recurring theme in the "Aatmachintan" series. It presents the idea of a divine presence guiding individuals toward self-realization and spiritual growth. In spiritual traditions, God is often seen as a source of strength, wisdom, and unconditional love, providing a foundation for moral and ethical conduct.

Studies have shown that a belief in a higher power can positively impact mental health, emotional resilience, and life satisfaction (Koenig, 2009). The series emphasizes that a relationship with the divine can serve as a catalyst for inner transformation and social harmony.

9. Role of Karma:

The concept of karma, or the law of cause and effect, is a fundamental principle in many spiritual traditions. In the "Aatmachintan" series, karma is presented as a key factor influencing an individual's life journey and spiritual growth. It suggests that actions aligned with one's higher self and values lead to positive outcomes, while actions driven by ego and selfishness result in suffering.

Research has explored the psychological implications of belief in karma, suggesting that it can motivate ethical behavior, enhance self-regulation, and promote personal responsibility (White, 2012). The series advocates for conscious living guided by the principles of karma to achieve inner and outer harmony.

10. Health Awareness:

Health awareness encompasses a holistic understanding of physical, mental, emotional, and spiritual well-being. The "Aatmachintan" series emphasizes the interconnectedness of these dimensions, suggesting that true health involves a balance of all aspects of life. Practices such as meditation, yoga, healthy eating, and ethical living are promoted as pathways to achieving complete wellness.

Studies have demonstrated that holistic health practices can lead to improved quality of life, reduced stress, and enhanced physical and mental health (Khanna & Greeson, 2013). The series highlights the importance of health awareness as a foundation for personal transformation and social harmony.

The literature reviewed provides a comprehensive understanding of the themes explored in the "Aatmachintan" series. It underscores the importance of self-awareness, spiritual growth,

emotional and mental wellness, motivation, and ethical living as critical components of inner transformation and social harmony. By integrating these insights, the paper aims to contribute to the discourse on the role of self-awareness and spiritual practices in fostering a more conscious and harmonious society.

Research Methodology

The research methodology for this paper involves a mixed-methods approach that integrates qualitative and thematic analysis to explore the insights and challenges of inner transformation as discussed in the "Aatmachintan" radio series. The methodology is designed to provide a comprehensive understanding of the themes related to self-discovery, spiritual growth, and social harmony. It includes the following components:

1. Research Design

The research is based on a qualitative design, focusing on the in-depth exploration of themes presented in the "Aatmachintan" radio series. The series serves as a primary data source, where the discussions led by Brahmakumar Anuj and Brahmakumari Ekta are systematically analyzed to identify key concepts, insights, and challenges related to self-awareness and personal transformation.

- **Qualitative Approach:** The qualitative approach allows for a detailed examination of the subjective experiences and perspectives shared in the series, providing a nuanced understanding of the psychological, emotional, and spiritual dimensions of inner transformation.
- **Thematic Analysis:** This method is used to analyze the content of the radio series. Thematic analysis involves identifying, analyzing, and reporting patterns (themes) within the data, allowing for the extraction of meaningful insights related to the study's objectives

2. Data Collection

The primary data for this study is derived from the "Aatmachintan" radio series episodes broadcast by JIMS Vasant Kunj. The series provides a rich source of discussions on self-awareness, spiritual growth, and social harmony, which are recorded and transcribed for analysis.

- **Content Selection:** A purposeful sampling method is employed to select specific episodes from the series that focus on key themes such as meditation, value-based introspection, spiritual guidance, emotional and spiritual wellness, the role of God, and the principle of karma.
- **Transcription:** The selected episodes are transcribed verbatim to capture the full scope of the discussions, including the narratives, reflections, and guidance provided by the hosts and participants.

3. Data Analysis

The analysis involves a multi-step process to identify and interpret the core themes related to inner transformation, as presented in the "Aatmachintan" series.

Thematic Analysis: Thematic analysis is conducted in several stages:

1. **Familiarization with Data:** The researchers listen to the audio recordings and read the transcriptions multiple times to become thoroughly familiar with the content.
2. **Generating Initial Codes:** Relevant segments of text are coded based on recurring ideas, concepts, and phrases related to mental health, yoga, emotional wellness, spiritual growth, motivation, and other relevant themes.
3. **Searching for Themes:** Codes are grouped into broader themes that represent significant patterns in the data. These themes are then organized into a thematic map.
4. **Reviewing Themes:** Themes are reviewed and refined to ensure they accurately reflect the data and research objectives. Sub-themes are identified where necessary to capture the nuances of the discussions.
5. **Defining and Naming Themes:** Clear definitions and labels are developed for each theme, and their relevance to the research questions is articulated.
6. **Interpretation of Findings:** The themes are interpreted in the context of existing literature on self-awareness, spiritual growth, and social harmony to draw meaningful conclusions.

Triangulation: To enhance the validity and reliability of the findings, triangulation is employed by comparing the insights from the "Aatmachintan" series with relevant literature and theoretical frameworks. This cross-validation helps ensure that the identified themes are consistent with

established knowledge in the field.

4. Ethical Considerations

The study adheres to ethical standards for research involving human subjects. The following ethical considerations are addressed:

- **Informed Consent:** Although the primary data is obtained from a publicly broadcast radio series, any additional information or insights gathered from the hosts or participants would require informed consent.
- **Confidentiality and Anonymity:** While the series is publicly available, care is taken to respect the privacy and confidentiality of the participants by anonymizing any sensitive information that may arise during the analysis.
- **Bias Reduction:** The researchers are aware of potential biases in interpreting the data and employ strategies such as peer debriefing and reflexivity to minimize subjective influences

5. Limitations of the Study

The research acknowledges certain limitations that may impact the findings:

- **Context-Specific Data:** The insights derived from the "Aatmachintan" series are context-specific and may not be generalizable to all populations. The findings are most applicable to individuals and communities engaged in similar spiritual practices and introspective processes.
- **Subjectivity in Interpretation:** As with all qualitative research, there is a degree of subjectivity in data interpretation. The researchers strive to maintain objectivity by using systematic coding and thematic analysis procedures.
- **Language and Cultural Context:** The discussions in the "Aatmachintan" series are rooted in Indian spiritual and cultural contexts, which may affect the applicability of findings to different cultural settings.

The research methodology is designed to provide a comprehensive and nuanced understanding of the themes of self-awareness, personal transformation, and social harmony as discussed in the "Aatmachintan" radio series. By employing qualitative and thematic analysis, the study aims to

contribute valuable insights to the discourse on the interconnectedness of inner transformation and community well-being, highlighting the role of spiritual practices and introspection in fostering a more conscious and harmonious society.

Conclusion:

This paper has explored the intricate relationship between inner self-awareness and the challenges of personal transformation, as examined in the "Aatmachintan" radio series broadcast by JIMS Vasant Kunj. By delving into themes such as meditation, value-based introspection, spiritual guidance, and the principles of karma and divine connection, the series provides valuable insights into the profound process of self-discovery. The findings from this research underscore the significance of these spiritual and introspective practices in overcoming psychological barriers, such as deep-seated fears, societal conditioning, and the struggle to align one's actions with inner values.

The analysis of the "Aatmachintan" series reveals that self-awareness is foundational to both personal growth and broader social harmony. The series emphasizes that true transformation begins with an individual's journey inward, confronting and understanding their inner conflicts, motivations, and purpose. This inner transformation, facilitated by spiritual practices such as yog (yoga), meditation, and value-based introspection, not only fosters personal growth but also enhances emotional and spiritual wellness, leading to more meaningful and purposeful lives.

The literature reviewed and thematic analysis of the series illustrate that programs like "Aatmachintan" serve as effective platforms for promoting introspection, motivation, and spiritual growth. Such programs have the potential to inspire individuals to pursue holistic health and wellness, encompassing physical, mental, emotional, and spiritual dimensions. By fostering a deeper understanding of the self and its connection to the larger social and ecological context, these initiatives can contribute to the creation of more conscious, ethical, and harmonious communities.

Furthermore, the role of spiritual concepts, such as the stages of yog outlined in the "Shrimad Bhagavad Gita," and the principles of karma and the divine, are shown to be crucial in guiding individuals toward ethical living and inner peace. These concepts encourage a shift from self-centeredness to a more compassionate and service-oriented approach to life, aligning personal

transformation with social and ecological well-being.

The findings of this research suggest that a paradigm shift toward inner awareness and spiritual practices could have far-reaching implications for both individual well-being and societal harmony. The interconnectedness of self-awareness, ethical conduct, and collective well-being highlights the need for more platforms like "Aatmachintan" that encourage reflection, dialogue, and spiritual exploration. By nurturing inner growth and fostering a culture of self-awareness and ethical living, societies can move closer to achieving true harmony and sustainability.

In conclusion, this paper contributes to the discourse on personal transformation and community well-being by proposing that inner self-awareness is not only a personal journey but a foundational element for fostering ecological and social harmony. Future research could further explore the impact of such introspective practices on diverse populations and cultural contexts, potentially broadening the understanding of how inner transformation can drive positive social change on a global scale.

Representing Women, Shaping Society: Media and Women's Empowerment in India- **Dr. Umesh C. Pathak****Abstract**

Men and women are the two foundational constituents of society, and while they are born equal in worth, they have historically been treated unequally — a condition that persists not only in India but across the world. The Manusmriti itself acknowledges that women give birth to the next generation, bring light to the home, and are the source of prosperity and good fortune; yet in practice, a mother is sometimes cast out of her own household by her children, and a daughter is kept apart from her parents. Swami Vivekananda observed that the progress of a nation can be measured by the progress of its women. Gender bias has persisted from antiquity into the twenty-first century, sustained largely by a social mindset that confines women to the domestic sphere and denies them parity with men. Although the Indian Constitution guarantees every citizen — regardless of sex — the right to equality, women continue to be disadvantaged in personal and proprietary rights, duties, liabilities, and social standing. This paper is organized into five substantive parts: the historical status of women in India, the role of women in Indian society, the history of Indian media, the role of women within the media, and the portrayal of women by the media.

Keywords: women, India, Vedic period, medieval period, independence movement, media history, empowerment, society, development.

Introduction

India is a country of rich cultures and traditions. Women are accorded the status of goddesses in Indian scripture, yet it is observed that, in practice, they are frequently treated as inferior to men. The role of women in Indian society is a critical one: a woman is, at various points in her life, a daughter, a sister, a wife, and a mother, yet history offers numerous examples suggesting that she has rarely received the respect these roles warrant. The Hindi poet Maithili Sharan Gupt captured this condition in a well-known couplet:

अबला जीवन हाय तेरी यही कहानी

आंचल में है दूध आंखों में पानी

("Alas, powerless one, this is your life story — milk in your breast, tears in your eyes.") These lines depict a woman reduced to the role of a mother who bears children, nurses them, and endures hardship in silence — a status that, historically, has continued to erode over time.

There was a period in which women enjoyed status and rights broadly comparable to those of men, but that period belongs to the past; the present is markedly different and, in many respects, harsher. It is often argued that a woman's status in India depends substantially on the family into which she is born, and that women in rural areas are more disadvantaged than their urban counterparts. While this may be broadly true, urban women are not exempt from difficulty: they too contend with gender discrimination and concerns about safety and security.

Objectives of the Study

This paper pursues three related objectives:

- To review the status of women in Indian society, in both rural and urban settings.
- To analyses the role of women within the Indian media.
- To examine how women are portrayed by the Indian media and the extent to which media practice contributes to women's empowerment.

Status of Women in Indian Society: Historical and Contemporary Context

Women in the Vedic Era

The status of women in India has undergone substantial change over time. In the ancient period, women are understood to have enjoyed rights and freedoms broadly equal to those of men. The grammarians Patanjali and Katyayana suggest that women were educated during the early Vedic period, and verses of the Rig Veda indicate that women married at a mature age and were permitted to choose their own husbands. Scholarship on the period generally holds that women enjoyed comparatively high status and extensive rights during the early Vedic and Vedic eras (Kashyap, 2010).

Women in the Medieval Period

The status of women began to decline in the medieval period, a decline that continued under later social and religious influences that further curtailed women's freedoms. Practices such as sati, child marriage, and restrictions on widow remarriage became embedded in social life across many Indian communities. The purdah system, associated with the spread of Islam in India, was adopted widely, and devadasis (temple women) were subject to sexual exploitation. Polygamy was common, and women in many households — including the zenana quarters of Muslim families — were secluded from men outside their immediate family. Women were, in effect, treated as the property of men: dominated by fathers before marriage and by husbands afterward.

Nevertheless, this period also produced women who distinguished themselves in politics, literature, education, and religion. Razia Sultana became the only woman to rule as monarch of Delhi. The Gond queen Durgavati ruled for fifteen years before losing her life in battle. Chand

Bibi defended Ahmednagar against the Mughal forces of Akbar in the 1590s. Nur Jahan, wife of the emperor Jahangir, wielded substantial imperial power and was widely regarded as the real force behind the Mughal throne. The Mughal princesses Jahanara and Zeb-un-Nissa were accomplished poets who also influenced court administration, and Jijabai, mother of Shivaji, served as queen regent in recognition of her ability as both warrior and administrator.

Women during the Independence Era

The situation began to change as national leaders took up the cause of women's participation in the freedom struggle. Mahatma Gandhi openly invited women to join the movement, and figures such as Sarojini Naidu, Vijaya Lakshmi Pandit, and Aruna Asaf Ali came forward as prominent participants. In the decades that followed, Indira Gandhi became Prime Minister of India, and Kiran Bedi became the country's first woman IPS officer — both achieving international recognition. Their prominence demonstrated that women were not inferior to men, and many women subsequently rose to prestigious positions across sports, politics, administration, science, and the arts.

Women in the Present Era

Following independence, the Constitution of India guaranteed equal rights to men and women in all spheres of life (Kashyap, 2010). Even so, it cannot be said that all Indian women enjoy parity with men in practice. Indian women's experience might be described as two sides of a coin. On one side are women who lack equal rights and access to basic education, who are restricted from leaving the household unaccompanied, and whose autonomy remains subject to a father before marriage and a husband thereafter. On the other side are women — often in metropolitan settings — who are well educated and professionally established, yet who must still contend with unequal treatment in matters of financial independence, personal security, and social status (Global Issues, n.d.).

Statistical evidence indicates that in a majority of reported rape cases, the accused is known to the victim. The Delhi gang rape of 16 December 2012 — in which a young woman was assaulted by six men despite being accompanied by a male companion — drew national and international attention to the persistent insecurity faced by women even within the capital of the nation.

Media in India: Historical Development and Forms

Indian media has a distinctive and varied history. It encompasses several forms of mass communication, including television, radio, cinema, newspapers, magazines, and internet-based websites and portals, governed primarily by private and semi-governmental organizations. Alongside these forms of mass media, traditional or folk media — folk song and music, folk

dance, yatra, drama and theatre, puppetry, and street theatre — continue to exist in both rural and urban settings (Kumar, n.d.).

Each branch of Indian media has its own history. Newspapers are the oldest of these forms: James Augustus Hicky founded the Bengal Gazette in Calcutta in 1780. Cinema arrived in India in 1913, radio broadcasting began in Pune in 1927, and television was introduced in 1959, initially for educational purposes; it gradually gained popularity, and Doordarshan launched a dedicated entertainment channel in 1991. The internet entered Indian media in the final decade of the twentieth century. With the advent of new technologies — mobile phones, tablets, notebooks, and outdoor media — these newer platforms are collectively described as "new media."

India today has more than 70,000 registered newspapers and over 690 satellite television channels, with an estimated 380 million radio users and 130 million television users. Internet usage, estimated at around 120 million users in 2013, was projected to reach 140 million by 2014, with young Indians drawn increasingly toward social media platforms such as Facebook, Twitter, YouTube, and blogging platforms. Mobile telephony has grown especially rapidly, with an estimated 251 million mobile users projected for 2014, opening substantial new channels for communication (Kumar, n.d.).

Women in Indian Media

As journalism developed into a profession, women were long restricted by custom and law from entering it, and those who did enter faced significant discrimination. Nevertheless, women worked as editors, reporters, sports analysts, and journalists even before the 1890s. In the contemporary period, this picture has changed substantially: women now work across virtually every field, including administration, entrepreneurship, medicine, law enforcement, computing, and politics, and the media industry in particular employs large numbers of women across all types of roles, including senior leadership positions.

Many aspiring journalists look to pioneering figures such as Homai Vyrawalla, India's first woman photojournalist, and Prabha Dutt, a trailblazing reporter with the Hindustan Times who — according to her daughter, the journalist Barkha Dutt — convinced her editors that women reporters were capable of far more than covering local flower shows. Barkha Dutt herself became known for her coverage of the 1999 Kargil War. Other prominent figures include Maya Mirchandani of NDTV, Suhasini Haider of CNN-IBN, and Anjali Kamat of the US-based Democracy Now, each of whom has served as an inspiration to aspiring female journalists. Even so, it remains a persistent pattern that women journalists are disproportionately assigned "soft" beats, based on an assumption — often unstated — that they are less suited to covering hard news.

At the same time, women are frequently portrayed as objects of entertainment or attention rather than as subjects in their own right, particularly within the advertising industry. It is not unusual for advertisements unrelated to women's interests or needs — for cement or steel rods, for example — to feature a woman whose presence appears designed chiefly to attract attention rather than to convey relevant information.

Role of Media in Women's Empowerment

Communication plays an important role in women's development, and the media is central to this process. Media has a significant part to play across virtually every dimension of social life — from managing population growth to spreading literacy and improving quality of life for the wider population — including in the empowerment of women specifically. Media can help create awareness among women of their own potential as agents of social change.

The concept of "development communication" refers to the use of mass media to advance social development in developing countries, and because women constitute an integral part of society, the media arguably bears some responsibility for contributing to their empowerment. Everett Rogers (1962) argued that media can support development by cultivating "opinion leaders" who act as intermediaries between policymakers and the wider public. Applying this framework, media that helps to cultivate opinion leaders holding positive attitudes toward women could meaningfully advance women's empowerment at the grassroots level. Media can also directly raise public awareness of women's rights through targeted programming and public discussion of relevant issues.

Discussion

This paper brings together three related dimensions: the changing status of women in Indian society, the development and reach of Indian mass media, and the representation and participation of women within that media. Its central argument is that media can contribute to women's empowerment by raising awareness, stimulating public discussion, and giving visibility to women's achievements. At the same time, media representation can also reproduce gender stereotypes, particularly where women are used primarily as objects of entertainment or as tools of advertising rather than as full subjects in their own right.

This discussion is best understood as a conceptual and descriptive review rather than as an empirical study based on a defined sample of media content. The paper does not employ a systematic sampling procedure, coding framework, explicit research questions, or a formal data-analysis method; its conclusions are accordingly interpretive rather than statistically derived, and should be read as a synthesis of secondary sources and existing scholarship.

Conclusion

Much as a cart requires both of its wheels to function, men and women together constitute the two essential parts of society, and a society cannot be fully formed or developed in the absence of either. Many men are aware of this reality even if they remain unwilling, in practice, to accept it. It is equally true that the suppression of either sex is detrimental to the health of a developing society.

At present, the media already plays a meaningful role in advancing social welfare, but it retains considerable capacity to do more — particularly in raising awareness among the wider population and among disadvantaged groups. Women's empowerment is one of the areas in which a stronger media presence could make a substantial difference. Across the board, media retains significant untapped potential to contribute to the advancement of women.

A Study on the Emerging E-sports Industry across the World

- Dr. Nisha Singh

- Dr. Jitender Vig

Abstract

At the beginning of this century, the eSports industry was not yet a major player although it already existed as a niche of video and computer games. The importance and interest-only began to increase with the rise of the internet and its infrastructure. Especially among the younger generation, eSports, today, has a significant meaning. Worldwide, professional players duel each other in countless tournaments online and offline and are enthusiastically celebrated by their millions of fans.

The purpose of this paper is to analyse how eSports has developed in recent years since its first boom phase as well as to analyse its growth factors and how it has benefited from the COVID-19 pandemic compared to traditional competitive sports.

Keywords- Sports, Covid-19, Pandemic

Introduction

Competition, as we know it traditionally, takes place between human players physically and analogously and is also called competitive sport. Depending on which sport is more or less popular in a country, this can be ball sports, martial arts, or motorsports. These competitive sports are extremely popular and are a common way for people to spend their time. In recent years, however, traditional competitive sports have increasingly faced competition from a new phenomenon called eSports. If, for example, football is played traditionally, human against human indoors or outdoors, the trend of competition is shifting more and more toward digital platforms. Using various devices, suitable video and computer games, players compete against each other and duel in front of spectators in games such as League of Legends (LoL), Counter-Strike: Global Offensive (CS: GO), and Defence of the Ancients 2 (DotA 2). The fact that this is not a fad can be seen in the increasing viewer and sales figures. Also, the gaming industry of today is already bigger than the music and movie industries combined. Older generations in particular do not know or understand eSports well.

The average eSports fan is only 26 years old according to PMG. In particular, approaching eSports from an economic perspective is still quite rare. There are a few business lyrical contributions, but there are hardly any empirical ones since game producers protect their data like a holy grail.

Industry Profile

The rising investment and sponsorship are expected to increase the growth of the esports market size. Increasing investment in the last two years is creating new avenues for development in the esports market. Investments in this sector have made considerable progress in recent years as the ecosystem provides several investment opportunities across a wide range of subsectors. According to a recent forecast, the esports ecosystem is on track to cross \$1 billion in sales for the first time this year. Money flows into esports through broadcast rights, live event ticket sales, merchandise sales, and in-game transactions, but most of the revenue comes from sponsorships and advertising.

Literature Review

The following literature review will give an overview of the findings in studies regarding eSports and present some contradicting results. The literature review will touch upon the factors that I, from a theoretical viewpoint and an ongoing modified understanding about the direction of this empirical research, believe are relevant for the scope of this thesis.

Since the eSports industry is a novelty to the majority of readers, we first introduce a definition of the term “eSports”. In the second step, we have a look at key financials of the eSports industry, such as its popularity and awareness, the global eSports revenue streams, viewership, and prize money. Then, we look at the COVID-19 pandemic since its occurrence and compare the eSports sector with traditional competitive sports to see how well they both have reacted to the crisis. Finally, we analyze key growth factors that have defined and shaped the eSports industry and that will also be important in the future.

The researcher has accumulated Secondary Data for use in this Paper.

Defining ESports

An official and globally accepted eSports definition does not exist, but recently more countries and organizations have started tackling this issue. The term “eSports” is relatively new and there are only a few definitions.

The German eSports association “eSport-Bund Deutschland e.V.” (ESBD) adopted the following definition at its general meeting on 26th October 2018 in Hamburg: “eSports is the direct competition between human players using suitable video and computer games on various devices and on digital platforms under defined rules.

The comparison of sporting performance in eSport is determined by the interaction of a purposeful operation of the input devices in direct reaction to the game sequence depicted while at the same time tactically mastering the overall game action.

The reference object of sports activities is video games whose structure and mode of operation meet the requirements for determining sporting performance, which do not leave the success of the game predominantly to chance and which offer a reproducible game framework for comparing the performance of the players.”

It is a common opinion that eSports is not physically exhausting or intense. However, a study amongst German eSports players showed that they are exposed to high levels of stress which are common for traditional sports. Up to 400 precise clicks on keyboard and mouse per minute are not uncommon. This uses different brain regions that are not accessed that much in any other sport.

Furthermore, it was found that the cortisol level was similar to that of a racing driver. Also, a high pulse of 160-180 beats per minute was measured, which is almost on par with a marathon runner. Nevertheless, eSports has existed for several decades and has now been expanding exponentially for a couple of years despite not having a worldwide standard regarding its definition and recognition as a sport.

E-Sports growth since 2010 :

Gaming on consoles, computers, most recently smartphones, and other devices has now been a part of our society for several decades and has been growing tremendously fast in recent years.

Nowadays, the acceptance among the mainstream is much bigger than it was just ten years ago. In 2018, gamers spent \$138.78 billion (\$ referring to USD) across all gaming platforms, with mobile games counting for 47% or \$63.2 billion in total. These numbers show that mobile gaming with tablets and smartphones has picked up momentum recently and has become the largest gaming platform of the entire industry. eSports awareness has been growing steadily with a number of 1.8 billion people aware of eSports in 2019, compared to 1.6 billion in 2018. Already back in 2014, 56% of all gamers in the US and 50% of all Western European gamers aged 10 to 50 were aware of eSports.

The actual eSports audience recorded a number of 443 million people in 2019, with 198 million being eSports enthusiasts that follow eSports regularly. Projections to exceed 646 million regular eSports followers by 2023 have been made as well. The constant growth of the gaming industry as a whole demonstrates a fairly widespread acceptance among the mainstream in 2019. Massive audiences in eSports suggest that the word “niche” is not the right way to describe it anymore as you cannot ignore these numbers.

The industry as a whole generated a global market revenue of only \$130 million in 2012 but reached \$865 million in 2018 with Newzoo.com, the global leader in games and eSports analytics that also shared these numbers, projecting the eSports market revenue to be at \$1.79 billion by 2022. Looking at the segregated revenues of the global market revenue, sponsorships generate the biggest amount with \$456.7 million, followed by media rights with \$251.3 million, advertising with \$189.2 million, merchandise & tickets with \$103.7 million, and game publisher fees with \$95.2 million, experiencing a combined 26.7% of year-on-year growth. Merchandise stuck out to Berenberg. According to them, merchandising is not utilized well in eSports yet. They showed that in regular sports, a fan generates on average \$54. Meanwhile, an eSports fan generates only \$1.8 on average.

The ever-growing prize pools and exposure :

Since eSports has been experiencing steady growth, the prize pools of tournaments have increased dramatically as well. The overall aggregated prize pool of all games was at a meagre of \$3 million in 2010, while it reached over \$121 million in 2017 seeing tremendous growth every year. Ranked by tournament prize pool in 2018, DotA 2 is leading the charts as shown

Overall, the top 10 eSports games by prize pool paid out \$131.41 million in 2018 and roughly reflect the popularity of the games as well. Canaccord Genuity forecasts \$543.69 million annual prize money by 2023. According to them, this estimated number is calculated conservatively. In particular, DotA 2, developed by Valve, has revolutionized the eSports industry. Every year since the release of the game, Valve organizes a world championship. For this championship, fans and players of the game can buy a so-called “compendium”. It provides the buyers with exclusive cosmetic items in the game. This way Valve has been able to generate massive prize pools for their championships, which has resulted in them being one of the leaders in prize money distribution. \$1.6 million came from Valve directly while the rest was crowdfunded by its fans.

Several tournament organizers of today have used a similar approach to make their tournaments more appealing to the audience with bigger prize pools. In fact, DotA 2 fills the entire top five in overall eSports prize pools for one single tournament, with the former editions of each year being topped every following year due to its unique way of crowdfunding the prize pool. Citigroup compared these prize pools to traditional sports and showed that today, eSports can already hold up against them relatively well:

Confederations Cup (Soccer, \$20 million), The Masters 2017 (Golf, \$11 million), Tour de France 2017 (Cycling, €2.29 million), Indy 500 2018 (Car Racing, \$13.07 million), just to name a few. Only the Confederations Cup came close to the one of The International 2018.

Viewership is an increasingly important growth factor as well, but the big tournaments do not always translate 1-to-1 when it comes to the prize pool. The Mid-Season Invitational 2018 (LoL, \$1.37 million prize pool) reached a staggering viewership of 60 million unique viewers compared to 55 million for The International 2018 (DotA2, \$25 million prize pool) over the timeline of this one tournament. Companies are also slowly starting to broadcast eSports tournaments on television.

Especially ELeague, which is produced by Turner Broadcasting System (TBS) in the US, has broadcasted several of their tournaments on their television channels with some finals streamed during prime time on weekends. It is a statement that professional companies think eSports of today is ready for the mainstream.

At the end of 2019, the coronavirus broke out in Wuhan, China. As of today, the entire world is fighting against the virus. The traditional sport came to a standstill for several months. For example, the German Bundesliga did not carry out a single game for 66 days. eSports has not been untroubled by the coronavirus as well. Many events had to be cancelled at short notice or had to be held online instead. One of the biggest German eSports events, ESL One Cologne, was cancelled due to COVID-19 and an online format was created instead. Nevertheless, the digital characteristics of eSports have been a great advantage during this time, since most events can also be held online. The infrastructure has been in place for years. Even international tournaments within the same continent can be held without problems. During the first wave of the COVID-19 pandemic, both streaming and gaming experienced big growth. Up-to-date key numbers of Twitch can be found on twitchtracker.com. Major leagues, such as League of Legends Championship Series (LCS), managed to switch to an online format within a week. Since many traditional sports leagues had no choice but to discontinue their regular league operations temporarily, many have ventured into eSports during these times. For example, Formula 1 has run an eSports league for three seasons. The drivers are under contract full-time at the official Formula 1 team. Therefore, without hesitation, Formula 1 was able to hold a mini-league, in which the postponed Grand Prix was held online as entertainment.

Formula 1 drivers, F1 eSports drivers and other personalities from the Formula 1 universe raced against each other. The NBA has planned an online league of the official, which will be broadcast on the ESPN television channel. The German Bundesliga also decided to organize a virtual tournament in the game FIFA 2020. The tournament was played with at least one professional soccer player in each team of two. 29 clubs of the 1st and 2nd Bundesliga took part in the Bundesliga Home Challenge.

Growth factors

Gaming itself has been growing fast and is now the biggest entertainment industry, as a report published on Reuters states. It generates a bigger revenue of over \$116 billion, compared to Television with \$105 billion, Film Box Office with \$41 billion, and Digital Music with \$16

billion. This growth in gaming naturally results in the growth of eSports as well as it gains popularity. The Business Research Company reported that eSports is going to be one of the most important growth factors for the traditional sports market. Since 2014, the global sports market has been growing by 4.3% annually. Due to the COVID-19 pandemic, the eSports market is expected to grow by only 2.16% in 2020. The eSports market is then expected to grow with a compound annual growth rate of 23.82%. Over the past years, cheaper hardware such as computers, smartphones, and gaming consoles has made eSports accessible for almost everyone. According to Newzoo, especially Latin America and Asia will benefit from portable devices such as smartphones and tablets. These continents are expected to be the fastest-growing eSports regions and, as a result, would soon be of high importance for the industry. Many countries are still limited by their infrastructure and wealth. As the internet and cheap technology is expanding, countries like India and Brazil are likely to become important for the growth of eSports. As stated by Long et al., the average eSports enthusiast is only 26 years old. In 2017, Indian gamers generated a market value of \$290 million, according to KPMG. However, there are over 600 million people under the age of 25 in India. The potential of the Indian market could become an opportunity in the billions.

As emerging economies grow, eSports will benefit greatly. The most important and biggest contributor to eSports growth in recent years has been live-streaming, particularly using the platform Twitch. tv, but also YouTube. Twitch came to life in 2011 and has since then completely changed the gaming industry and still does so. Before Twitch, it was a costly and complicated procedure to get gaming content released in real-time, but Twitch allowed content creators to live-stream their gaming content effortlessly. Since the website is focused primarily on gaming, there is now a way to reach a large number of fans simultaneously. In addition to an easy way of streaming eSports content, Twitch has given organizations the ability to demonstrate their value in numbers, which in turn makes it easier to negotiate to sponsor deals.

Twitch has become the central platform for live-streaming gaming content, which also includes eSports events and eSports players streaming their gameplay. In recent years, broadcasting deals as they are known in traditional sports have become more popular as well. Amazon saw the potential of this platform early on, acquiring it for \$970 million back in 2014. Twitch has changed video games and particularly the niche eSports into a spectator sport, thus stimulating tremendous growth for years and continues to do so as the leading platform for eSports related content.

Conclusion

eSports has developed over the past decades with highs and lows until it developed a rather stable position in society. Twitch. tv has been a big contributor to the stability of eSports and its growth. They continue to be one major growth factor as they bring together millions of fans from around the globe. In recent years, this new kind of sport—eSports—has established itself in

society. The ongoing COVID-19 pandemic has shown this. Popular sports and motorsports used the pandemic as an opportunity to venture into eSports. It shows that the enormous network behind these traditional sports (companies, sports clubs, sponsors etc.) think eSports is ready for the mainstream.

The digital character of eSports has shown that during this crisis, it is a valuable competitive outlet with a big advantage over traditional sports. For further research, it would be interesting to find out whether eSports is similar to traditional sports and could thus be recognized as a sport by governments. The advantages and disadvantages that would come with this could be analyzed. We have learned that there is huge potential in untapped markets. Mobile eSports is growing tremendously fast. Emerging economies are quickly developing but are still lagging in eSports. Countries like India will provide big growth rates in the following years as they take advantage of mobile hardware and also have high population numbers at young ages. Companies such as Twitch (transforming eSports into a spectator sport) and Valve (crowd-funding gigantic prize pools) keep innovating the market and stimulating the development of the industry. The global eSports revenue annually grows quickly and has surpassed the \$1 billion mark. Despite the growth, still untapped potential in merchandising could lead to a stable income pillar in the future. Regarding merchandising, a more detailed breakdown could be interesting to see why there is such a big difference between its effectiveness in traditional sports and eSports or whether it has become more profitable already. As the argument whether eSports is a sport is going on, researchers have identified the eSports market (23.82% CAGR) as one of the most important growth factors for the traditional sports market (4.3% CAGR). Games such as LoL, Dota 2, and CS: GO have established themselves as growth drivers and unite a large number of fans. The awareness of eSports is growing quickly considering almost two billion people have at least heard of eSports by now. At the same time, demand for eSports events is growing at a double-digit rate each year. While prize money was not common in the past, the amounts are now in the millions and took an important role which is not necessarily the case in traditional sports.

- Crowd-funding prize pools and thus creating higher prize pools than those found in popular traditional sports has been a great way of attracting millions of viewers. As a result, more and more players want to play eSports professionally and have the opportunity to do so. This development increases the quality and also the interest in eSports. The quality of eSports games is getting better and better and is slowly moving into the homes of citizens. It remains to be seen to what extent eSports will be able to compete with established sports in the future. At least it can be said that the generational change and also that the interest in eSports is in full swing. In the future, the interest of the societies for sport and eSports will merge, and the discussion of recognition will be forgotten.

Swami Vivekananda's Perspective on Communication: Bridging Traditional Wisdom and Modern Media

- Amit Sharma

Abstract

Swami Vivekananda's teachings have long emphasized the profound impact of effective communication, blending the richness of traditional wisdom with the necessities of modern discourse. This research paper examines Swami Vivekananda's perspective on communication, focusing on how his principles can bridge the gap between ancient Indian philosophical insights and contemporary media practices. The study explores Vivekananda's key teachings on clarity, simplicity, and ethical communication, rooted in Vedantic philosophy, and assesses their relevance in today's fast-paced media environment.

By analyzing his speeches and writings, the paper highlights the enduring value of traditional wisdom in fostering responsible and impactful communication. It also delves into the challenges and opportunities presented by modern media, emphasizing the need for ethical standards and responsible journalism. Through case studies and comparative analysis, the research demonstrates how integrating Vivekananda's principles can enhance modern media practices, offering a more holistic and ethically grounded approach to journalism and mass communication education.

The findings suggest that Vivekananda's vision for communication, which prioritizes truth, ethical conduct, and spiritual depth, is not only relevant but also essential in addressing contemporary media challenges. This study provides a framework for incorporating these timeless principles into modern media strategies, advocating for a balanced approach that honors traditional wisdom while embracing the innovations of the digital age.

Introduction to Swami Vivekananda's Life and Philosophy

Swami Vivekananda, born Narendranath Datta in 1863, was a towering figure in the Indian spiritual renaissance and a key proponent of Vedanta and Yoga in the late 19th and early 20th centuries. A disciple of the mystic Ramakrishna Paramahansa, Vivekananda played a crucial role in introducing Indian philosophies to the Western world, especially at the 1893 Parliament of the World's Religions in Chicago. His teachings emphasized the unity of all religions, the divinity of the soul, and the importance of selfless service. Vivekananda's philosophy integrates spirituality with practical action, advocating for a balanced approach to life that includes both

inner development and societal progress.

Importance of Communication in Vivekananda's Teachings

Communication was a cornerstone of Vivekananda's mission. He believed that effective communication was essential for spreading spiritual knowledge and fostering social change. Vivekananda's speeches and writings are characterized by their clarity, directness, and powerful rhetoric, aimed at inspiring and educating diverse audiences. He emphasized the need for truthful, ethical communication, viewing it as a means to uplift individuals and society. According to Vivekananda, the power of words and ideas can transform lives, making communication not just a tool for information exchange, but a profound instrument for spiritual and moral development.

Relevance of Bridging Traditional Wisdom with Modern Media

In today's rapidly evolving media landscape, the principles of traditional wisdom as taught by Swami Vivekananda hold significant relevance. Modern media, with its vast reach and influence, often grapples with challenges related to ethics, responsibility, and the dissemination of truthful information. By integrating Vivekananda's teachings on ethical and effective communication, contemporary media practices can be enriched, promoting a more balanced, respectful, and truthful exchange of ideas. Bridging traditional wisdom with modern media not only enhances the quality of communication but also addresses the growing need for media that upholds moral values and societal well-being.

Objectives

- To analyze Vivekananda's teachings on communication and their foundational principles.
- To assess the relevance of traditional wisdom in enhancing contemporary media practices.
- To identify strategies for integrating Vivekananda's principles into journalism and mass communication education.
- To provide a framework for a more ethically grounded and spiritually enriched approach to modern media.

Literature Review

Research on Swami Vivekananda's teachings has primarily focused on his spiritual and philosophical contributions, with a significant emphasis on his vision for education and social reform. Scholars have highlighted his advocacy for a balanced approach to education that combines spiritual wisdom with practical knowledge (Ramakrishnan, 2015). Vivekananda's communication style—marked by clarity, conviction, and moral integrity—has been studied as a model for effective public speaking and persuasive communication (Mukherjee, 2013). However, specific analyses of his teachings on communication, particularly in the context of modern media, remain limited.

The integration of traditional wisdom into modern educational and media practices has been explored in various contexts. Studies have shown that incorporating ethical and philosophical teachings from traditional sources can enhance the moral and intellectual development of students (Sharma, 2018). In media studies, there is a growing recognition of the need for ethical journalism and the role that traditional wisdom can play in fostering responsible media practices (Patel, 2020). Research has also indicated that traditional narratives and storytelling techniques can be effectively used in modern media to engage audiences and convey complex messages (Rao, 2017).

Contemporary media plays a crucial role in shaping public opinion, disseminating information, and influencing social and cultural norms. However, the media landscape is often criticized for ethical lapses, sensationalism, and a lack of accountability (Thakur, 2019). The proliferation of digital media has further complicated issues of truth and reliability, with concerns about misinformation and the erosion of journalistic standards. Researchers have called for a re-evaluation of media practices, emphasizing the need for media literacy and ethical frameworks to guide modern journalism (Singh, 2021).

Despite the extensive body of work on Swami Vivekananda's philosophy and the role of traditional wisdom in education, there is a notable gap in research specifically addressing the application of Vivekananda's communication principles to modern media. Existing studies tend to focus on broad educational reforms or ethical guidelines without delving into the practical

integration of these principles in journalism and mass communication. This paper aims to fill this gap by providing a detailed analysis of Vivekananda's teachings on communication and exploring how these can be effectively applied to enhance contemporary media practices. The research will offer a framework for incorporating traditional wisdom into media education, promoting a more ethical and responsible media landscape.

Methodology

1. Research Design and Approach

The research design for this study adopts a qualitative approach, focusing on a comprehensive analysis of Swami Vivekananda's teachings on communication and their relevance to modern media. The study aims to explore the theoretical underpinnings of Vivekananda's communication principles and identify practical strategies for integrating these principles into contemporary journalism and mass communication. The research is mostly based on textual analysis and expert interviews to gain a holistic understanding of the subject.

Data Collection Methods

- **Textual Analysis:** The primary data source was Swami Vivekananda's speeches, writings, and recorded lectures. These texts were analyzed to extract key themes and principles related to communication. The analysis focuses on identifying recurring motifs, rhetorical strategies, and ethical guidelines advocated by Vivekananda.
- **Interviews with Experts:** Semi-structured interviews were conducted with scholars and practitioners in the fields of communication, journalism, and media studies who are familiar with Vivekananda's work. These interviews provide insights into the practical applications of his teachings and their potential impact on modern media practices.

Analytical Framework

- **Thematic Analysis:** The textual analysis of Vivekananda's works was conducted using thematic analysis, a method that involves identifying and analyzing patterns or themes within

qualitative data. This approach helps to systematically categorize the key principles of communication emphasized by Vivekananda and explore their implications for modern media.

- **Comparative Analysis:** Comparative analysis used to juxtapose Vivekananda's communication principles with contemporary media practices. This method highlights the contrasts and synergies between traditional wisdom and modern media approaches, providing a basis for integrating these principles into current practices.

Limitations of the Study

The study acknowledges several limitations. First, the reliance on textual analysis of historical texts may result in interpretations that are influenced by the researcher's perspective. Efforts were made to mitigate this by cross-referencing findings with scholarly interpretations and expert opinions. Second, the scope of the study is limited to qualitative methods, which may not capture the full spectrum of perspectives on the integration of traditional wisdom in modern media. Future research could benefit from incorporating quantitative methods to provide a more comprehensive analysis. Lastly, the study is constrained by the availability of experts familiar with both Vivekananda's teachings and contemporary media practices, which may limit the breadth of insights obtained from interviews.

By employing a robust qualitative methodology, this research aims to provide a nuanced understanding of how Swami Vivekananda's communication principles can be effectively integrated into modern media, offering a framework for ethically grounded and spiritually enriched journalism and mass communication practices.

Swami Vivekananda's Teachings on Communication

Analysis of Key Teachings and Philosophies of Vivekananda Related to Communication

Swami Vivekananda's teachings on communication are deeply rooted in his philosophical and spiritual beliefs. He emphasized the power of words and the responsibility that comes with using them. According to Vivekananda, effective communication is not just about conveying information but also about inspiring and uplifting the audience. His speeches and writings often highlighted the importance of being concise, clear, and impactful. He believed that every word

should carry the weight of truth and the light of wisdom, and he urged his followers to communicate with conviction and sincerity.

Importance of Clarity, Simplicity, and Truth in Communication

Vivekananda was a proponent of clear and simple communication. He argued that complex and convoluted language often obscures the truth and alienates the audience. For him, simplicity was not a sign of weakness but a testament to the speaker's understanding and mastery of the subject. Clarity in communication was seen as a reflection of clarity in thought. Moreover, truth was the cornerstone of his communication philosophy. Vivekananda stressed that truthful communication builds trust and integrity, both essential for effective and meaningful interaction.

Role of Spirituality and Ethics in Effective Communication

Vivekananda's approach to communication was inherently ethical and spiritual. He believed that true communication transcends mere words and involves the transmission of values and principles. Spirituality, in his view, provided the foundation for ethical communication. He encouraged communicators to be mindful of their intentions and to ensure that their messages promoted harmony, understanding, and positive action. By embedding spirituality and ethics into communication, Vivekananda aimed to foster a culture of respect, empathy, and responsibility.

Traditional Wisdom in Vivekananda's Communication

Examples of Traditional Indian Wisdom in Vivekananda's Communication Style

Vivekananda's communication style was heavily influenced by traditional Indian wisdom. He often drew upon stories, parables, and teachings from ancient Indian scriptures to illustrate his points. His use of analogies and metaphors from the Vedas, Upanishads, and epics like the Mahabharata and Ramayana made his messages relatable and engaging. This approach not only enriched his communication but also connected his audience with their cultural heritage.

Influence of Vedantic Philosophy on His Communication Principles

Vedantic philosophy, which emphasizes the unity of all existence and the divinity within each

individual, was a significant influence on Vivekananda's communication principles. He believed that recognizing the inherent divinity in every person fosters respect and empathy in communication. This perspective encouraged him to communicate with humility and to listen with an open heart. Vedanta's focus on self-realization and truth also underpinned his commitment to truthful and meaningful communication.

Relevance of These Traditional Principles in Modern Communication Contexts

The traditional principles espoused by Vivekananda are highly relevant in today's communication landscape. In an era characterized by information overload and superficial interactions, the emphasis on clarity, simplicity, and truth is more pertinent than ever. The ethical and spiritual dimensions of his communication philosophy can help address contemporary issues such as misinformation, sensationalism, and the erosion of trust in media. By incorporating these traditional principles, modern communicators can foster more authentic and impactful interactions.

Modern Media and Communication

Overview of Modern Media Landscape and Communication Strategies

The modern media landscape is vast and multifaceted, encompassing traditional print and broadcast media, as well as digital platforms and social media. Communication strategies have evolved to include multimedia content, interactive engagement, and real-time updates. The rise of digital media has democratized information dissemination, allowing individuals and organizations to reach global audiences instantly. However, this landscape also presents challenges, such as the spread of misinformation, the decline of traditional journalism standards, and the emphasis on speed over accuracy.

Challenges and Opportunities in Modern Media

Modern media faces several challenges, including the need for constant content generation, maintaining credibility in an age of misinformation, and navigating the ethical implications of new technologies. However, these challenges are accompanied by opportunities. The widespread

accessibility of digital platforms allows for greater diversity of voices and perspectives. Innovative communication strategies, such as data journalism and interactive storytelling, offer new ways to engage and inform audiences. There is also a growing demand for media literacy education to help consumers critically evaluate information sources.

Importance of Ethics and Responsibility in Modern Journalism and Mass Communication

Ethics and responsibility are crucial in modern journalism and mass communication. The media's role in shaping public opinion and influencing societal norms underscores the need for ethical standards and accountability. Journalists and communicators are tasked with the responsibility of providing accurate, fair, and unbiased information. Upholding ethical principles helps build trust with audiences and ensures that media serves its role as a pillar of democracy. In this context, the integration of ethical guidelines inspired by traditional wisdom, as advocated by Vivekananda, can significantly enhance the credibility and impact of modern media.

Bridging Traditional Wisdom and Modern Media

Analysis of How Traditional Wisdom Can Enhance Modern Media Practices

Traditional wisdom, as articulated by Swami Vivekananda, can enhance modern media practices by infusing them with ethical and spiritual dimensions. The principles of clarity, simplicity, and truth can help combat misinformation and sensationalism. Ethical communication fosters trust and credibility, essential for maintaining the media's role as a reliable information source. Additionally, the spiritual aspect of communication encourages empathy and respect, promoting more constructive and meaningful dialogues in the media.

Case Studies or Examples Where Traditional Principles Have Been Successfully Integrated into Modern Media

Several case studies demonstrate the successful integration of traditional principles into modern media. For example, media organizations that prioritize ethical journalism and transparency, such as the BBC and The New York Times, have maintained high standards of credibility and trust. Initiatives like constructive journalism, which focuses on solutions-oriented reporting,

reflect the principles of positivity and responsibility advocated by traditional wisdom. Furthermore, educational programs that incorporate ethical training for journalists highlight the practical application of these principles in media education.

Strategies for Incorporating Vivekananda's Communication Principles into Journalism and Mass Communication Education

To incorporate Vivekananda's communication principles into journalism and mass communication education, several strategies can be employed:

- **Curriculum Integration:** Include courses on ethical communication, spirituality in media, and the historical impact of traditional wisdom on journalism.
- **Workshops and Seminars:** Conduct workshops and seminars led by experts on Vivekananda's teachings, focusing on their application in modern media contexts.
- **Practical Training:** Implement practical training modules that encourage students to apply principles of clarity, simplicity, and truth in their reporting.
- **Ethical Frameworks:** Develop and adopt ethical frameworks inspired by traditional wisdom to guide journalistic practices and decision-making.
- **Case Study Analysis:** Encourage students to analyze case studies where traditional principles have enhanced media practices, fostering a deeper understanding of their relevance and application.

By integrating these strategies, journalism and mass communication education can produce media professionals who are not only skilled in their craft but also grounded in ethical and spiritual values, aligning with Swami Vivekananda's vision for effective and responsible communication.

Discussion

The analysis of Swami Vivekananda's teachings on communication reveals several key principles that are highly relevant to modern media. Vivekananda's emphasis on clarity, simplicity, and truth provides a strong foundation for ethical communication practices. His belief in the power of words to inspire and uplift underscores the importance of responsible and

impactful communication. The integration of traditional wisdom, particularly Vedantic philosophy, into communication highlights the role of spirituality and ethics in fostering meaningful interactions. Modern media, with its vast reach and influence, stands to benefit greatly from these principles, addressing contemporary challenges such as misinformation, sensationalism, and the erosion of trust.

Integrating traditional wisdom with modern media practices has profound implications for the media industry. By adopting Vivekananda's principles of clarity, simplicity, and truth, media organizations can enhance their credibility and build trust with their audiences. Ethical communication, rooted in traditional wisdom, can serve as a counterbalance to the pervasive issues of misinformation and sensationalism, promoting a more informed and discerning public. The emphasis on spirituality and ethics can also foster a media environment that prioritizes empathy, respect, and constructive dialogue, contributing to a more harmonious and cohesive society. Additionally, incorporating traditional storytelling techniques can enrich content, making it more engaging and culturally resonant.

The integration of Vivekananda's communication principles into journalism and mass communication education has the potential to transform the field. By embedding ethical and spiritual dimensions into the curriculum, educational institutions can produce media professionals who are not only skilled in their craft but also grounded in moral values. This holistic approach to education can foster a new generation of journalists and communicators who prioritize truth, responsibility, and empathy in their work. Practical training that emphasizes clarity, simplicity, and ethical decision-making can enhance students' ability to navigate the complexities of the modern media landscape. Moreover, the adoption of ethical frameworks inspired by traditional wisdom can guide journalistic practices, promoting a culture of integrity and accountability within the media industry.

Overall, the synthesis of findings highlights the enduring relevance of Swami Vivekananda's teachings on communication and their potential to enhance modern media practices. The implications of integrating traditional wisdom with modern media are far-reaching, offering solutions to contemporary challenges and fostering a more ethical, responsible, and impactful media environment. The potential impact on journalism and mass communication education

underscores the importance of holistic and values-driven training, preparing future media professionals to contribute positively to society.

Conclusion

This research paper has explored Swami Vivekananda's perspective on communication and its relevance to modern media practices. It began by examining Vivekananda's teachings, emphasizing clarity, simplicity, and truth in communication, rooted in Vedantic philosophy and ethical principles. The discussion highlighted examples of traditional Indian wisdom embedded in Vivekananda's communication style and analyzed their applicability in contemporary media contexts. The paper also provided an overview of the modern media landscape, identifying challenges such as misinformation and the importance of ethics in journalism and mass communication.

The synthesis of Vivekananda's teachings with modern media practices underscores the importance of bridging traditional wisdom with contemporary communication strategies. Vivekananda's emphasis on ethical conduct, spiritual values, and effective communication provides a framework for addressing the ethical dilemmas and challenges facing today's media environment. By integrating traditional wisdom, media organizations can enhance credibility, foster trust with audiences, and promote responsible journalism. This approach not only enriches content but also cultivates a media culture that values integrity, empathy, and social responsibility.

Recommendations for Future Research and Practice

Moving forward, future research and practice should focus on several key areas:

- **Further Exploration of Vivekananda's Teachings:** Conduct deeper analyses of specific aspects of Vivekananda's communication philosophy, such as his views on narrative storytelling or the role of media in social reform.
- **Empirical Studies:** Undertake empirical studies to assess the impact of integrating traditional wisdom into media practices, including audience perceptions, media consumption patterns, and societal outcomes.

- **Educational Reforms:** Advocate for curriculum reforms in journalism and mass communication education that integrate ethical frameworks inspired by Vivekananda's teachings.
- **Collaborative Initiatives:** Encourage collaborations between academia, media professionals, and spiritual leaders to develop practical guidelines and initiatives for ethical media practices.
- **Longitudinal Studies:** Conduct longitudinal studies to track the long-term effects of integrating traditional wisdom on media organizations, societal trust in media, and democratic processes.

By pursuing these avenues, stakeholders can contribute to a media landscape that upholds ethical standards, promotes meaningful dialogue, and serves the public interest. The integration of traditional wisdom with modern media not only preserves cultural heritage but also advances the goals of responsible journalism and mass communication in an increasingly interconnected world.

Role of Media in Trade and Food Security: A Perceptual Study of Delhi Youth

- **Dr. Nisha Singh**

- **Vipin Negi**

Abstract

It is commonly said that food, clothing and shelter are the basic or bare minimum need of the human being. All the countries and international agencies like UN, SAARC, BRICKS etc. spend thousands of millions in their budget and other policies to ensure that every person should at least get a nominal quantity and quality of food but still harsh reality is that in country like India there is a big population who don't even get to eat one proper meal in a day. Hence food availability is the most important factor regarding food security. In India we enjoy the great cultural diversity in terms of food, flavor, species, cuisines-locally, regionally, and Internationally but the alarming question is the food which we are eating is safe and secure for us or not. In today's world food security is one of the major concerns of the every country. Hence every Govt. tries to insure the food security of the people through the various laws and acts. Any act and law can be beneficial only when the people are aware about it. According to USAID Food security is often defined in terms of food availability, food access and food utilization.

Food security and poverty alleviation programmes help to produce more and diversified products and produce a surplus that can be marketed and thereby generate income for the purposes of improving quality of life through improved diet and nutrition and also help in ensuring that each and everyone quality(hygienic and nutritious) food.

In the area of food security, one such good might be a supply of cheap food made available to the poor through a public food distribution system. In other cases the pursuit of food security might even require that private goods (such as land) be taken from a traditionally privileged category of citizens, with or without compensation, for redistribution to disadvantaged citizens. In still other cases food security might require government action to reduce racial prejudice or gender inequity.

Prime Minister Narendra Modi recognizes the need for reform. In the summer of 2014, he appointed a high-level committee to study the operation of India's food procurement system. In

addition to finding that much of the food procured for distribution to the poor was being lost to mismanagement and corruption, the committee concluded that two other key objectives were not being met:

Only 6 percent of farmers receive market price support from procurement. Buffer stocks are larger than needed, leading to high storage costs and wasted food.

In country like India here population is more but good quality food access is very less. To increase the productivity of the agriculture, farmers are using various types of chemicals which are directly affects the human beings. It causes various type of disease. Farmer should do organic farming. Organic farming is good for health but its cost is very high and difficult to access to common man. Govt. should promote organic farming with the help of media. Media can help to promote the organic farming and good effects of organic food. Media is agent of social change because it is persuasive in nature. Through various media like TV, Internet, Radio, Newspaper, magazine can send the information to the anonymous and heterogeneous public. India govt. is working one Clean India campaign but it is useless if people are not aware about healthy and safe food.

Objectives

1. To study the youth awareness about food and security.
2. To know how can media play a role in creating awareness about food and security.
3. To evaluate the people's perceptions about role of media towards food and trade security.
4. To know how much youth is concerned about food and trade security.

Hypothesis

- H1:- Media can play vital role to create awareness among youth towards good and healthy food.
- H2:- People get knowledge about food security through media.

Review of the literature

Mark W. Rosegrant, Claudia Ringler (1999) the researchers conclude that water management, especially in the rural sector, is important part of food security. If the water management is taken care of it will help to solve much of food security problem. It would help to improve food productivity and create employment opportunity in rural areas where agriculture is main

occupation.

Katherine Alaimo, Christine M. Olson (2001) the researchers observed that not only hunger but also food insecurity is one of the major causes of eating disorders leading to problems like obesity amongst the women.

Defra Group (2006) the research explained that climatic and environmental conditions are a big factor effecting food availability and hence creating food insecurity and various international agencies or countries should come together to combat such natural uncertainties.

Marc J. Cohen (2007) the researchers explained the policy makers should pay greater attention to how food inflation have impact on urban people. It also highlights the evidence on how these impacts have played out during crisis and discusses how policies could be adjusted and improved to better protect the urban poor.

Sophia Murphy (2010) paper provided a brief review of grain reserves—why governments created reserves, to a large extent dismantled them and are now again interested in re-establishing them in some form. Food security policy field has been colored by the debate between proponents of state-led versus market-led development, there is an assumption that the trade rules put in place by the WTO curtail countries' ability to establish and operate a grain reserve.

Joshua Meltzer (2013) food security issues within the WTO—a setting the seeks to create new market access opportunities—points to a growing consensus that international trade can enhance food security by increasing access to sources of food. By focusing on the goal of food security, India could take a leadership role in designing new trade disciplines in the WTO that takes advantage of imports and new market access opportunities for its agriculture sector in the developed world to increase its food security and the welfare of its farmers.

Kimberly Ann Elliott (2015) the researcher observed that India faces huge food security challenges. It is home to one-quarter of all the undernourished people worldwide. And nearly half of all children in the country and one-third of adults aged 15 to 49 are malnourished, according to the World Food Programme. The survey found evidence of significant leakage of the rice and the wheat not getting to intended beneficiaries.

Research Design

- Sample Size:- 150 respondents were selected for this study.
- Sampling Method:-researchers have selected convenience sampling method to select the sample.
- Research Method: - to meet the above objective Survey method has been selected.

Result and Analysis

- During the research, it was found that 68.6% respondent's hygiene health and taste are important factors for buying a food product. 13.7% respondents were saying taste is more important than them for buying a food product. On the other hand, 11.8% respondents were saying healthy food is more important for them.
- It was found that maximum respondents like to eat Indian, healthy, vegetarian, home-made food and which is healthy hygiene or tasty also.
- Very few of them replied that they like to eat spicy, junk food, Italian, Chinese, street food and they gave preference to taste only.
- On the question of where they like to eat food, almost half percentage (47.1%) respondents were saying they like to eat food at their home and 23.1% respondents were saying they like to eat food anywhere. 20.2% respondents replied that they can eat food in all places.

89.3% respondents responses that home food is safe for them. Very few respondents replied that nowhere food is safe. Only 13.7% respondents felt that food they are consuming is completely safe for them. 37.3% said that the food there are consuming is normally safe for them. 35.3% were replied that food there are consuming is partially safe for them. On the other hand, 10.8% respondents were saying that the food there are consuming is nearly not safe for them.

- Almost every respondent said that they know that market food is harmful. It increases cholesterol, increase fat, stomach upset, unhygienic, cause of food poisoning. They also know that this food is made up of different kind of preservatives. Very less respondents replied that they do not know about harmful effects of market food. Very few said they don't bother about harmful effects of market food.

- Yes they know that it is harmful for their body said by more than half respondents (53.5%) but still they consumed it because of their taste, according to them it has been converted to our regular life style and livelihood, taste matters and more than this we are affected by the food and cuisine of other countries. On the other hand, some respondents replied that they have very less option all type of food are harmful. Few respondents said that they eat junk food occasionally not regularly, they consumed it because it is tasty, less harmful, more priced than organic food. Price of food is also a big reason to continue these food products.

67.6% said that yes they know that government of India recently banned any food product. They

know that Maggi is banned by Indian Government but very less know that it is banned due to excess MSG lead quantity. They said that they never felt unhealthy after eating Maggi noodles.

29.3% respondents said that last year they get this information that any food product is banned by Indian government. 21.2% respondents replied that they knew it recently. 24.2% respondents not replied anything. They were quiet on this question.

67% respondents said that they get information of banned products through media. On the other hand, 21% respondents said that they get this information through all (media, family, friends or any other sources).

- 54.5% respondents said after banning the food product, they never consumed any banned product. On the other hand, 34.7% respondents said they consumed banned products. 10.9% respondents said they can't say anything.

- Almost everyone (97%) respondents said that they know about Mid-Day Meal. Only 3% replied that they don't know about Mid-Day Meal. 30.7% respondents replied that Mid-Day Meal food is partially health for children. 28.7% respondents said that Mid-Day Meal is merely not health for children. 18.8% respondents replied that Mid-Day Meal is normally health for children. 17.8% respondents said that Mid-Day Meal not at all healthy for children.

On the question of Trade and Food Security Act, only 33% respondents were found to be aware about it. 53% respondents said that they don't know about it.

- On the question of food availability food quantity and food price in India respondents replied that food is available in India in food quantity but its distribution is not equal. Poor people are not consuming food not even one time. Food quality is also not good and price of food is very high. Some respondents said that in metro cities, we can say it is not a big issue but in villages or small areas situation is not satisfactory. Street food is popular in India since masses are consuming from there, whereas big brands go for taste and charge more from customers and low value for money, said by respondent.
- According to 54% respondents, they said that if they found adulteration, they complaint about it. 17% respondents said they were not taken any action. 6% respondents said they were not react to it and 19% respondents were saying they don't know what to do after food adulteration.
- 53% respondents were replied that media can play a complete role in trade and food security. On the other hand, 31% respondents were saying media can normally play any role in it. 10% respondents said that media can partially play any role in it.

Only 6% respondents were found completely satisfied with media role in food security. 27% respondents were saying that they were nearly not satisfied with media role in food security. 34% respondents were saying they are partially satisfied with the media role in food security. 20% respondents said they were normally satisfied with media role in food security.

- Media can help if media frequently circulate the information about healthy product and its harmful effects on our body. Media can educate the people free of cost without being a greedy compound in a real mass communication way, while communication with the masses by a true heart and soul to care for people across the globe said by respondents. Few respondents said that media can help by spreading the information about acts and rights and awareness about harmful effects of adulterated food items. Some respondents replied that by not promoting banned or unhealthy food, media can help us. Media can advertise social advertisement which can educate and inform the public about harmful effects. Media should give the unbiased and complete news regarding the food products. Some respondents replied that it is their responsibility to check the food products quality before giving them advertising slot in their newspaper and other media.

During the survey, it is found that 72.2% respondents think that government should make the law for media regarding the promotion of food security. Only 8.2% respondents were saying that they think that there is no need to make any law for media regarding the promotion of food security. 19.6% respondents were quiet on this issue.

- Respondents said that if they promote harmful food products, their channels must pay good fine or imprisonment. On the other hand, few respondents were saying that government should give media an open permission that they can advertise freely in any food manufacturing company and do survey without any objections.

34.4% respondents were saying that media is active only in festive season. It is nearly not active. 31.3% respondents were saying they think that media is normally active on news only. 22.9% were saying that media is partially active.

- Some respondents said that government should give imprisonment to then those who promote harmful products through various ways and few said there is no need of a media law as media should work freely.

- Respondents said media can educate the government with help at various campaign. There can be free commercials giving education about the law and bill. Media should promote organic farming. Media should analysis the food availability and food quality.

- Media should cover food security programs at least once a week and make sure that during these prime programs food related ads aired less and create awareness and campaigns among children and push the government to take strict action against the company who didn't follow minimum standards said by few respondents. Media should know it is social responsibility without bear favor and allegiance.

- Media can coordinate with government bodies and share information since they keep on doing strings near festivals. Media should play a bigger role than what they are playing right now.

Conclusion

According to the research, most of respondents are not aware about food security and even the

educated class is not aware about food security act. Out of all the respondents not even single knows about the food trade. These responses are alarming and clearly indicate that there is big valley between information available and awareness about food security amongst the youth. Hence, media needs to gear up and do this herculean task of creating awareness about the same. Media cannot do it single handedly it has to done in close association with the government and international agencies like WTO. Media coverage regarding the food security is more or less limited to depicting cases of food adulteration but it does not have much coverage regarding the food security acts, food standards, the redressal cells, alternate food and rights of consumer, testing labs.

**Impact of Green Marketing on Social Media: A Study of Consumer Behavior towards
Green Awareness Communication Campaigns on Social Media**

- **Vaishnavi Srivastava**

- **Dr. Nisha Singh**

Abstract

Social Media has been an effective medium in communicating the needs of green products in the market through intelligent Communication Campaigns which raise the awareness on importance of Green Products. The respective Media Research, highlights the impact of Green Marketing Communication Strategies on Social Media by conducting a study on Consumer Behavior towards Green awareness communication campaigns on four such social media platforms through their responses on the questionnaire on of awareness green marketing campaigns on Facebook, Instagram, Twitter and LinkedIn.

Many concerns have been raised in the consumer market since the Intergovernmental Panel on Climate Change IPCC released its Sixth Assessment Report on WG III, contribution in the Chapter 2- Emissions trends and drivers stated that the two countries (China and India) were responsible for causing more than 50% increase in GHG emissions during 2010-2019 (at 39% and 14%, respectively). In such times of crisis, need of severe reform in the consumer habit needs to be implemented to protect the mankind from consequences of climate change.

Use of Green Marketing is one way for businesses to contribute in saving the resources to protect the planet and promoting wise usage of products among their social circle whilst building social relationships amongst their respective consumer market. The demand for green marketing has been encouraged for the firms through mandatory Corporate Social Responsibility campaigns to communicate the green products as a way to help “save the planet” which has cultivated a sense of care among their consumers. Green marketing communication strategies not only build the product and company image but also educate the society about the need to reform and use the resources with care to avoid the consequences of climate change.

Keywords- Marketing, Green product, ClimateChange, Social Media

Introduction:

Now a day, online social websites such as Facebook, Instagram, Twitter and LinkedIn; are all the prime sites that are widely accessed on the Internet. Meta is the major medium which has enabled businesses to function with ease to reach an even larger audience to promote their products and services.

Among all the marketing strategies to advertise a business, the marketing of green products has been highlighted in this research paper. Green Marketing Communication Strategies target “Green,” highly environmentally conscious (HEC) consumers for marketing environmentally friendly products. This particular section of consumers is willing to pay a higher price out of their income for the betterment of our environment and, therefore, need to be informed about the product’s environmentally friendly qualities. However, it is challenging to find the right channel to communicate these environmental qualities to consumers. While they need to know about product quality, they are also sensitive to informational ambiguity, and environmental quality-related information is often ambiguous, with unclear propositional content (e.g., pictures of green landscapes). Moreover, nowadays such obscure information about the environment appears to lead consumers to perceive every product as ‘environment friendly’ which is known as greenwashing. Hence, it is important for the companies to establish a trustworthy ‘Green Identity’ in the consumer market to build consumer trust and not only state the impact of their services and products on the environment honestly but also use the company’s resources to averse the consequences of Climate Change. According to the Companies Act, 2013 under section 135 which focuses on Corporate Social Responsibility (CSR) of a Company states, it is mandatory for the companies covered to comply with the CSR provisions in India. Companies are required to spend a minimum of 2% of their net profit over the preceding three years as CSR.

Social Media as a channel to target HEC consumers can be very effective if marketing strategies include the right way to communicate about the product or service in accordance with consumer benefits and its impact on the environment. Furthermore, are HEC consumers becoming increasingly skeptical about environmentally friendly (product) information, increasing challenges for green marketing communication through Social Media? If so, how can the communication of environmental qualities be effectively achieved across to consumers of all age groups? Which Social Media platform has the highest rate of conversion of customers? Do consumers even find Social Media a credible source for the purchase of green products?

To address these questions, we draw on recent findings and the elaboration likelihood model (ELM), as a theoretical framework to develop hypotheses regarding consumer responses to different green marketing communication strategies on social media. In India, approximately 25% of consumers prefer environmentally safe products also known as green products.

Furthermore, approximately 28% of the consumers are considered to be health conscious. (ref. GreenMarketing in India: An Overview by Prof. Jaya Tiwari)

The process of production activities carried out by the company often impacts environmental degradation, so to save the companies from that defamation the promotion of green marketing strategies is considered an innovation on this problem. The term "Green Marketing" was introduced in the late 1980s and early 1990s by the American Marketing Association (AMA), which organized its first workshop themed "ecological marketing". The goal of green marketing

is not only to earn profit as the main company's goal but also to contribute to the environment or those related to sustainability (Papadopoulos et al. 2010). The company is expected to encourage good habits of consumers to care about the environment, such as saving paper, using used paper, and saving energy for both present and future lives. The company produces eco-friendly products to meet customer needs and its concern for environmental sustainability (Chan et al. 2012).

Considering several aspects such as the increasing attention to environmental issues and scarcity of natural resources, corporate social responsibility is deemed essential to increase awareness of the development of green marketing concepts or similar concepts such as sustainable marketing and environmental marketing. These efforts begin by identifying and analyzing marketing management among the green consumers in Delhi. In this case we focus on, green marketing strategy through marketing communication in the business world on social media.

As noted, a major challenge in convincing HEC consumers that products are environmentally sound is that vague environmental arguments, such as phrases or motifs, might be perceived as “greenwashing”, that is, “misleading consumers regarding the environmental practices of a company or the environmental benefits of a product or service.” A drawback that social media is that majority of the green marketing strategies may lead to greenwashing reducing the effectiveness of the green marketing campaign.

Research Gap:

The research gap is defined as a topic or area for which missing or inadequate information limits the ability of reviewers to reach a conclusion for a given question. Here in our research study the question is if the youth is willing to spend on green products. While there has been conducted a significant study on whether millennials are ready to spend. There has not been any significant study on youth or generation z to understand the take of youth towards environment.

This study aims to understand the behavior of youth purchase of green products and bridge the gap between the needs for the consumer of young generation and the companies willing to take action for the environment.

Review of Literature:

Through the years, especially since the emergence and rapid increase of Online media, people have studied and researched about the impact of the medium for green marketing trying to deduce the more reliable one and which is preferred by the masses.

Some of the published papers by esteemed researchers talked about –

Shih-Chih Chen (March 2019)- His study proposed the effects of social media marketing activities on continuance intention, participation intention and purchase intention via the mediation of social identification, perceived value, and satisfaction.

Khalid Jamil (January 2022) - His study explored social media marketing activities (SMMAs) and their impact on consumer intentions (continuance, participate, and purchase). This study also analyzes the mediating roles of social identification and satisfaction. The participants in his study were experienced users of two social media platforms Facebook and Instagram in Pakistan.

Sidharth Muralidharan (December 2015) - His study examined the interrelationships among major environmental antecedents, such as environmental knowledge (EK), perceived consumer effectiveness (PCE), and environmental concern (EC) on environmentally conscious consumer behaviour (ECCB). The results of an online survey with younger Millennials revealed that EK and EC were significant predictors of ECCB, with EC being the stronger predictor.

Ninh Hyugen (February 2019) – One of his findings concluded that whilst environmental concern has the greatest influence on attitudes towards purchasing organic food, knowledge about organic food has the weakest impact on such attitudes.

Anna Regina (February 2020) – Her study explored the advent of Web 2.0 new social media tools, and how stakeholders can exercise new forms of interacting and sharing information through the Internet. Online corporate pages or blogs, wiki and petitions websites, and particularly social networks like Twitter and Facebook are redefining the interactions and communications between companies and their stakeholders.

M Hayes (July 2020) – Their study showed how the COVID-19 pandemic has impacted sport and events greatly with a shutdown of leagues and the postponement of events like the 2020 Tokyo Olympic Games. However, new media technologies, such as social media platforms, have provided an avenue for sport organisations and athletes to continue to engage with their consumers and promote physical activity during the absence of live sport.

Hongwei He (August 2020) – His study offered initial examination on how Covid-19 pandemic can influence the developments of CSR and marketing. We argue that Covid-19 pandemic offers a great opportunity for businesses to shift towards more genuine and authentic CSR and contribute to address urgent global social and environmental challenges.

Debora Scarpato (December 2020) - Her research aimed to interpret the multifaceted relationship between social media information and sustainable consumption in terms of food choices, environmental awareness, and consumer information, which is the novel contribution of this study. Moreover, among the new findings is the result that social media tends to create homogenised consumption, which, in many cases, is an attitude that depletes the environment. Limitations of this study and the results obtained outline future research directions.

Hypothesis:

(H0) Consumers do not want to buy products which are environment friendly.

(H1) Consumers are ready to take onus of the loss happening to the environment and spend money to reduce the impact on the environment through social media campaigns.

Objectives:

1. To reflect on the comparative analysis of awareness green marketing campaigns across 4 socialmedia platforms namely on Facebook, Instagram, Twitter and LinkedIn.
2. To examine the perception of audience on green communication on Social Media.
3. To recognize the importance of green marketing on Social Media.
4. To perceive the prospect of focusing the marketing of social campaigns entirely towards SocialMedia.

Research Design

This research paper is intended to be a quantitative attempt to explore whether the consumers indeed find green products worth purchasing from Social Media through successful green marketing strategies.

Sampling Method:

A researcher examines all these aspects, according to the research topic and problem, which is later deduced and analysed for proving the hypothesis true or false. The sampling method used in this research paper is the 'Voluntary Response Sampling' Method. This method of sampling refers to when the individuals voluntarily respond to the researcher's survey without any form of force or push from the researcher.

Sample Size: Researcher requires for the research purpose or even the number of minimum responses required by the researcher, is 100 people in thisresearch paper.

Research Method

This research paper analyses if green marketing on social media has an impact on the consumers enough to drive sales of green products through the quantitative method of survey research. The research began with forming a questionnaire that ran over the interest of the masses and their preferences for reading different types of green marketing campaigns run on social media by mega companies. The questionnaire was then shared through different platforms where the responses of the samples were undertaken and analysed. The sample size was 20 including people from different age groups ranging from 18 years to 45 and above years of age.

Research Tool

This research paper aims to study whether there is an indenting impact of socially run communication campaigns which have a message of saving the environment on the consumers to start investing in a better future for tomorrow. It also aims to deduce what actually works to drive sales through social media communication campaigns of green products. This being Quantitative research it uses the method of Survey through Voluntary Response Sampling Method to gather the data relevant to this research.

The survey is carried out through a Questionnaire that involves questions overviewing the topic and going through aspects of the impact of social media platforms, namely, Instagram, Facebook, LinkedIn and Twitter on the consumers.

Data Analysis

The research paper titled 'Impact of Green Marketing on Social Media: A Study on Consumer Behavior towards Green Awareness Communication Campaigns on Social Media' aims to study the driving factor for the consumers mainly between the age group 18-45 and above. The data was collected through an online questionnaire inclusive of questions running over the various social media campaigns run by mega companies. Here in the questionnaire we are focusing mainly on Godrej and Starbucks. The sample size of the research is 100 respondents which were fulfilled. 95% of the respondents agreed to use green products. 60% respondents strongly agree that it is important for them to use products which are safe for the environment.

Here a mixed of responses were received as only 20% agreed strongly for being environment friendly. The highest number of green campaigns were noticed on Instagram with 85% effectiveness and least on YouTube and WhatsApp with 5%. According to the responses 70% of the respondents would prefer to participate in a social media campaign if promoted on Instagram. While 10% believed Facebook campaigns were more effective. 75% of the respondents agreed to be users of Godrej Products. More people preferred purchasing Godrej home care products, 75%. While least preferred Environmental products, 40% people gave a rating of 4 to Starbucks for promoting Environment Sustainability. While 35% people gave rating of 5, 20% gave rating of 1 and 5% gave rating of 6. 65% respondents agreed to spend more money on the environment friendly products. While 10% disagreed and some were neutral. 70% respondents agreed to spend more money on companies like Godrej and Starbucks which take initiatives towards an environment friendly future. 55% of the respondents agreed that Green Marketing Communication Campaigns by Godrej and Starbucks created a positive impact on them. This

data was then analysed using data analysis software which is IBM SPSS (Statistical Package for Social Sciences). It is a quantitative data analysis software which is used and trusted by researchers all over the world for analysing their research data and the validity of their hypothesis not just in the field of social sciences but in others as well. The tool was first launched in the year 1968.

The features of SPSS software include - a) It is really easy to export any form of collected data to the SPSS software. b) The data in this software is stored in the .SAV format. c) It has easy access to data with different variables which makes it easy for the researchers to operate this software even if a newbie. d) It helps in an in-depth analysis of the data imported, having a lot of features for different forms of data analysis be it descriptive, statistical or others. e) It also presents data in tabular form or graphs, and the work gets easier for the researcher to present the analysis. The data for this research on the topic 'Impact of Green Marketing on Social Media: A Study on Consumer Behavior towards Green Awareness Communication Campaigns on Social Media' was analysed through the SPSS software.

Procedure

1. The first step once the SPSS was downloaded was figuring out the question that was related to the research hypothesis and included responses from the respondents. The responses of the question were then added to the SPSS sheet.
2. The second step in analysing the data was turning the close-ended answers to numerical codes for data analysis. This was done through Transform => Automatic Recode => Transferring the list Giving a new name to the list i.e. 'Variables' and then clicking on Okay. This assigned all the responses different codes, in this case, No = 2, Maybe = 1 and Yes = 3. The final numerical list was then added to the SPSS sheet alongside the previous list.
3. The third step included analysing the data through a test. This data was analysed using a Non-parametric test which was a One Sample Test since our sample was a single and small group of 20 people.

4. The test was conducted through Random Test along the KS Sample Test also known as the Kolmogorov - Smirnov Test. The data analysis was an automated process in the software which represented the data in a frequency bar graph form.

5. The frequency bar graph and the Hypothesis test result were represented on an Output Sheet which looked like the following –

Conclusion

According to the research study conducted on ‘Impact of Green Marketing on Social Media: A Study on Consumer Behavior towards Green Awareness Communication Campaigns on Social Media, a survey was conducted amongst the consumers who were asked questions regarding their social media usage and active participation in the campaigns on social media. As social media is very prevalent in today’s time, society needs such activities to keep transforming the community. However, it is very important to check from time to time whether or not, those activities presented on social media are sending across the right message. Especially in times of need where our climate is suffering. The Research study on Impact of Green Marketing on Social Media: A Study on Consumer Behavior towards Green Awareness Communication Campaigns on Social Media proves that the consumers indeed are willing to spend money for the right campaigns. Godrej and Starbucks are the companies who under their (Corporate Social Responsibility) CSR. Initiatives continue to promote environment sustainability and are indeed making a positive impact on the society. The study can be further elaborated upon the kind of working strategies amongst the consumers and the demographic concentration or annual income as variables for further study. The results came through the SPSS according to the audience’s response to the question – ‘Are you ready to spend more money on environment friendly products?’ As represented in the frequency graphs above, the maximum number of people voted for ‘Strongly Agree’ which means the majority of the audience believes that they want to spend more money on the environment friendly products. Also, the hypothesis test states to reject the Null Hypothesis.

This proves the second hypothesis (H1) as correct which states - ‘Consumers are ready to take onus of the loss happening to the environment and spend money to reduce the impact on the environment through social media campaigns.’

**The Impact of Amazon Prime Video's Marketing Strategies on Viewership Behaviour
Among Indian OTT Audiences**

- **Mr. Jai Bhatia**

- **Dr. Priyanka Tyagi**

Abstract

Over-the-top (OTT) platforms have transformed entertainment consumption in India, and Amazon Prime Video has positioned itself as a leading player through marketing strategies that combine influencer collaborations, regional campaigns, social media promotion, and bundled subscription offers. This study examines how these strategies influence Indian viewers' awareness, perception, and viewing behaviour, with particular attention to audience response to Amazon Prime Video's rental-based subscription model. Grounded in the Uses and Gratifications Theory and the Integrated Marketing Communications model, the study treats audiences as active participants who respond selectively to marketing appeals that satisfy entertainment, social, and psychological needs. A structured online survey of 62 Indian OTT viewers aged 18–45 was analysed using percentage and frequency distribution, supported by thematic analysis of open-ended responses. The findings show that Amazon Prime Video's marketing strategies, particularly Instagram-based promotion and influencer endorsement, have a measurable positive effect on audience perception and binge-watching frequency, and that a majority of respondents would consider switching to a lower-cost, ad-supported tier if offered. At the same time, the study finds a marked mismatch between high awareness (77.4%) and low actual use (30.6%) of the rental-based content model, with respondents expressing that paying for rental content on top of a subscription reduces the perceived value of their plan. The study contributes to a limited body of India-focused research on Amazon Prime Video's marketing strategy and offers practical implications for OTT platforms balancing promotional innovation with pricing transparency.

Keywords:

Amazon Prime Video; digital marketing strategy; OTT viewership; Uses and Gratifications Theory; audience engagement; rental-based subscription

Introduction

The twenty-first-century digital revolution has fundamentally altered the entertainment industry, moving audiences from scheduled television broadcasting to on-demand streaming through Over-The-Top (OTT) platforms. Services such as Amazon Prime Video, Netflix, Disney+ Hotstar, and ZEE5 have redefined media consumption by giving viewers control over what, when, and how they watch. Among these, Amazon Prime Video has emerged as one of the most actively marketed platforms in India, continuously experimenting with promotional strategies to attract and retain subscribers within a highly competitive OTT market.

In recent years, Amazon Prime Video has adopted a marketing approach that blends content personalisation, influencer-driven campaigns, and regional storytelling with digital promotion across social media. These efforts extend beyond conventional advertising; they aim to build emotional connection, deliver localised content experiences, and integrate Prime Video within Amazon's wider commercial ecosystem, positioning the platform less as a standalone streaming service and more as part of a broader lifestyle brand.

Whether these marketing innovations translate into measurable changes in audience behaviour, however, remains under-examined in the Indian context. As India's OTT market continues to expand rapidly, understanding how Amazon Prime Video's marketing choices shape viewer engagement, brand loyalty, and content preference is of direct relevance to media scholars, marketing practitioners, and the platform itself. This study addresses that gap by examining the relationship between Amazon Prime Video's marketing strategies and viewership behaviour among Indian audiences, with specific attention to the platform's rental-based subscription model, which requires some subscribers to pay an additional fee for premium titles despite holding an active paid plan.

Background of the Study

The OTT sector in India has grown rapidly, driven by affordable internet access, rising smartphone penetration, and a shift in audience preference toward personalised, on-demand, and regionally relevant content. Within this environment, marketing strategy has moved from simple advertising toward data-driven, emotion-oriented campaigns that draw on user data, algorithmic recommendation, and locally resonant storytelling. Amazon Prime Video's use of influencer

collaborations, regional-language campaigns, and cross-platform promotion reflects this broader industry shift toward the localisation of global streaming brands for Indian audiences.

Despite this, comparatively little academic research has examined how Amazon Prime Video's marketing strategies specifically affect Indian viewership, as distinct from the general dynamics of OTT marketing. This study responds to that gap by focusing specifically on the Indian audience's response to Amazon Prime Video's evolving promotional strategy, including their perception of and behaviour toward its rental-based content model.

Statement of the Problem

Although Amazon Prime Video has implemented a range of marketing approaches — influencer-driven promotion, regional content campaigns, and a rental-based subscription model for select titles — the extent to which these strategies shape audience perception, loyalty, and content preference in India remains insufficiently understood. It is unclear whether these strategies generate lasting audience engagement or only short-term visibility, and whether the rental-based pricing model is accepted or resented by subscribers who already pay a recurring subscription fee. With intensifying competition from Netflix, Disney+ Hotstar, and JioCinema, understanding what distinguishes Amazon Prime Video's marketing approach — and where it creates friction with subscriber expectations — is important for both scholarly understanding and platform strategy.

Review of Literature

The literature reviewed for this study spans ten sources — including journal articles, a business case study, and applied research reports — that collectively address OTT branding, consumer preference, pricing strategy, digital and social media marketing, and platform-specific controversy. They are synthesised below by theme rather than by individual source, to better situate this study's contribution within the existing body of work.

Platform Branding and Positioning

A related but unattributed source in the original review discusses Amazon Prime Video's marketing strategy in India as characterised by localised content creation, celebrity-driven campaigns, bundled membership pricing, and emerging hybrid monetisation models,

synthesising secondary data from journals, conference papers, trade publications, and news sources published between 2019 and 2025. This source identifies research gaps in evaluating the long-term effect of Prime Video's campaigns on subscriber retention, particularly following its shift toward ad-supported streaming. This source could not be attributed to a specific author or year and should be verified by the researcher before it is cited or referenced in a final submission.

Consumer Preference and Satisfaction

Together, these studies establish content quality and pricing as consistently important drivers of OTT satisfaction in India, but each is geographically or demographically bounded — Chennai, Thrissur, or a broad but unspecified national sample — leaving open the question of how marketing-specific strategies, rather than product attributes generally, shape perception and behaviour.

Digital and Social Media Marketing

These findings are directly relevant to the present study, whose own survey results identify Instagram as the dominant channel through which Indian respondents encounter Amazon Prime Video's marketing (cited by 85.5% of respondents), and confirm that influencer and social-media-driven promotion measurably shapes viewing decisions.

Research Gap

Taken together, the reviewed literature establishes that Amazon Prime Video's branding, pricing, and social media marketing have each received some independent academic attention, but several gaps remain.

Geographic Limitation of Prior Studies

Wayne's (2017) comparative branding analysis is based on the U.S. market and cannot be assumed to generalise to India, where linguistic diversity, regional identity, and cultural preference shape audience response differently.

Regional Scope of Indian Studies

Existing India-focused research (e.g., Dai Prasad & Minakshi, 2020, in Chennai; Sujit & Mohan, 2021, in Thrissur) is geographically narrow. Studies confined to a single city or district risk missing the socio-economic, linguistic, and cultural diversity that characterises OTT audiences across India; larger, pan-India studies would offer more generalisable findings.

Limited Research on New Monetisation Models

No study identified in this review has empirically examined audience response to Amazon Prime Video's ad-supported tier or its rental-based subscription model in India, despite both being directly relevant to subscriber retention, satisfaction, and willingness to pay.

Overall Scarcity of India-Focused Research

Despite the scale of OTT consumption in India, academic research focused specifically on Amazon Prime Video's marketing strategy — as opposed to the OTT sector generally — remains limited, and few studies offer a systematic comparison of Amazon Prime Video's strategy against its principal competitors.

This study addresses these gaps by focusing specifically on Amazon Prime Video's marketing strategy and its relationship to viewership behaviour among Indian audiences, with particular attention to the underexamined rental-based subscription model.

Theoretical Framework

This study is grounded in two complementary theories: the Uses and Gratifications Theory, which explains why audiences engage with media and marketing content, and the Integrated Marketing Communications model, which explains how a brand structures that content across channels. Used together, they allow the study to examine both the demand side (viewer motivation) and the supply side (platform strategy) of the relationship between Amazon Prime Video's marketing and its viewership.

Uses and Gratifications Theory

Applied to this study, UGT reframes Amazon Prime Video's marketing activity not simply as exposure that viewers passively absorb, but as content that competes to satisfy these underlying needs. An influencer's recommendation, for instance, can satisfy a social-integrative need (shared

viewing as a basis for conversation) as much as it informs; a trailer posted on Instagram can satisfy an affective or tension-free need (anticipation, entertainment) independent of its informational content. This framing is directly testable against the survey data: the finding that 75.8% of respondents say influencer and social media promotion shapes their choice of what to watch, and that 63.9% say trailers make them watch sooner, is consistent with viewers actively seeking out marketing content because it gratifies a need, rather than merely tolerating it as advertising.

Integrated Marketing Communications

Applied to Amazon Prime Video, the IMC perspective explains how the platform's various promotional activities — Instagram and YouTube content, influencer partnerships, in-app notifications, and bundled offers tied to Amazon's retail ecosystem — function as parts of a single coordinated strategy rather than as isolated tactics. This helps interpret findings such as the 51.6% of respondents who report that bundled retail offers increase their interest in Prime Video: this cross-promotional effect is only possible because Amazon's marketing is integrated across its retail and streaming businesses rather than confined to the video platform alone.

Objectives of the Study

- To examine how Amazon Prime Video's marketing strategies influence viewers' perceptions, preferences, and overall mindset toward the platform.
- To assess the extent to which these strategies affect viewers' preference for Amazon Prime Video over competing OTT platforms.
- To investigate how audiences perceive and respond to Amazon Prime Video's rental-based subscription model for premium content, particularly in relation to their existing quarterly or annual subscription.

Research Questions

- RQ1: How do Amazon Prime Video's marketing strategies influence Indian viewers' perceptions and preferences?

- RQ2: To what extent do these strategies affect viewers' likelihood of watching and preferring Amazon Prime Video over competing OTT platforms?
- RQ3: How do subscribers perceive and respond to the rental-based subscription model for premium shows and movies, given their existing paid subscription?

Research Methodology

Research Approach and Design

The study follows a primarily quantitative approach, supplemented by a small set of open-ended questions to capture qualitative insight into participants' personal experiences. The research design is descriptive and analytical; descriptive in documenting current patterns in Amazon Prime Video's marketing exposure and audience response, and analytical in examining the relationship between marketing exposure and viewership behaviour.

Population and Sample

The target population comprised Indian OTT viewers aged 18–45, including both current Amazon Prime Video subscribers and non-subscribers, selected as the demographic segment most actively exposed to digital marketing and advertising. A simple random sampling method was applied with the intention of ensuring representation across age, gender, income level, and geographic region (urban and semi-urban). The target sample size was 80 participants; the survey yielded 62 valid responses, which falls within this target range and forms the basis of the analysis reported below.

Data Collection

Data were collected through a structured questionnaire administered online via Google Forms and distributed through social media. The instrument included both closed-ended items — including several five-point Likert-type agreement scales — and open-ended questions, covering three key areas: awareness of Amazon Prime Video's recent marketing strategies, experience with and perception of the rental-based subscription model, and overall customer satisfaction and loyalty.

Data Analysis Procedure

Quantitative responses were analysed using percentage and frequency distribution, with results presented in tabular form for interpretive clarity. Open-ended responses were analysed thematically, with recurring patterns in participant comments grouped into descriptive themes reported in the Findings section below.

Limitations of the Study

- The sample of 62 respondents may not represent the full diversity of the Indian OTT audience.
- Data collection took place entirely online, which may have excluded rural populations and audiences in areas with limited internet connectivity.
- External factors such as competitor marketing activity, pricing changes, or new content releases on rival platforms may also have influenced reported viewership, independent of Amazon Prime Video's own marketing.
- Survey responses are self-reported and may be subject to personal or recall bias.

Findings

This section presents the results of the survey, organised into five tables that group related questionnaire items together: respondent profile, OTT and subscription usage, marketing awareness and behavioural change, attitudinal response to marketing, and response to the rental-based subscription model. Interpretation of these results, and their relationship to the study's theoretical framework and reviewed literature, follows in the Discussion section.

Respondent Profile

Table 1. Respondent demographic profile (N = 62)

Characteristic	Distribution
Age	18–45 years; highest concentration between 18 and 34.
Gender	66.1% female; 33.9% male.
Occupation	43.5% employed; 35.5% students; 11.3% freelancers; remainder self-employed or homemakers.
Monthly household income	29.0% under ₹20,000; 24.2% ₹20,000–49,999; 35.5% preferred not to disclose; remainder ₹50,000 and above.
Location	Multiple Indian states and cities; largest single concentration (32.3%) from Dehradun.

OTT and Amazon Prime Video Usage**Table 2. OTT platform usage, subscription type, tenure, and daily viewing time (N = 62)**

Response category	% of respondents
Do you currently use any OTT platform?	
Yes — Amazon Prime Video	75.8%
Yes — other OTT platform(s) only	12.9%
No	11.3%
If you use Amazon Prime Video, what type of subscription do you currently have?	
Annual / Yearly membership	35.5%
Ad-supported / lower-cost tier	35.5%
Quarterly / Monthly membership	12.9%
No Prime subscription	16.1%
How long have you been using Amazon Prime Video?	
Less than 6 months	27.4%
6 months – 1 year	22.6%
1–2 years	30.6%
More than 2 years	19.4%
Average time spent watching OTT content per day	
Less than 1 hour	33.9%
1–2 hours	40.3%
2–4 hours	21.0%
More than 4 hours	4.8%

Marketing Awareness and Behavioural Change**Table 3. Marketing channel exposure and self-reported change in viewing behaviour (N = 62)**

Response category	% of respondents
Channels through which respondents have seen Amazon Prime Video's marketing (multiple selection)	
Instagram	85.5%

Facebook	59.7%
YouTube	59.7%
Twitter / X	27.4%
WhatsApp forwards	22.6%
Amazon shopping app	19.4%
Influencer posts / reels	19.4%
Television ads	12.9%
Blogs / news articles	8.1%
None of the above	1.6%
Have you changed your viewing behaviour after seeing Amazon Prime Video's recent marketing?	
Yes — watch more on Amazon Prime now	54.8%
No change	35.5%
Yes — watch less on Amazon Prime now	9.7%
Which factor most influenced your viewing increase?	
Marketing campaigns	45.2%
New / interesting content	35.5%
Other (pricing/bundles, app experience, personalised recommendations, no change, prefer not to say)	19.3%

Attitudinal Response to Marketing

Table 4. Agreement with statements about Amazon Prime Video's marketing (5-point scale, N = 62)

Response category	% of respondents
"Amazon Prime's recent marketing campaigns have made me more positive about the platform."	
Strongly agree	38.7%
Agree	22.6%
Neutral	27.4%
Disagree / Strongly disagree (combined)	11.3%

"Seeing trailers or posts on Instagram/YouTube makes me watch shows sooner."	
Strongly agree	41.9%
Agree	21.0%
Neutral	24.2%
Strongly disagree	11.3%
Disagree (remainder, not individually specified in source data)	≈1.6%
"Influencer promotions and social media ads influence my decision to watch specific shows." (Yes/No)	
Yes	75.8%
No	24.2%
"Bundled offers with Amazon shopping increase my interest in Prime Video." (Yes/No)	
Yes	51.6%
No	48.4%

Response to the Rental-Based Subscription Model

Table 5. Awareness, usage, and willingness to switch regarding the rental-based subscription model (N = 62, unless noted)

Response category	% of respondents
Are you aware that some shows require additional rental fees even with a subscription?	
Yes	77.4%
Maybe	12.9%
No	9.7%
Have you ever paid extra for rental content on Amazon Prime?	
Yes	30.6%
No	69.4%

If yes, what motivated you? (n = 36 who had paid for rental content)	
Exclusive content	72.2%
Urgent new release	19.4%
Recommendation by influencer	13.9%
Other (promotional offer / no clear reason)	8.3%
If Amazon launched a cheaper ad-supported plan, would you switch?	
Very likely	67.7%
Neutral	16.1%
Likely / Unlikely / Very unlikely (combined)	16.2%

Qualitative Themes from Open-Ended Responses

Two open-ended questions asked respondents what Amazon Prime Video could improve, and for any further comments on its marketing or rental model. Responses clustered into five recurring themes for each question:

What should Amazon Prime Video improve to increase your viewing?

- Reduce advertising interruptions during streamed content.
- No further suggestion — several respondents felt the current marketing approach is already effective.
- More engaging social media campaigns and user polls, including deeper influencer collaboration.
- Dissatisfaction with pricing and the rental model, with respondents feeling that renting content after already paying for a subscription reduces perceived value.
- Requests for more visible regional and multilingual content, clearer separation of free versus paid titles, and mood- or genre-based personalised recommendations.

Further comments on marketing or the rental model

- Strong resistance to the rental model itself, with respondents describing it as a form of "double charging" relative to their existing subscription.

- A number of respondents offered no further suggestion, stating that Amazon Prime Video's existing marketing already appeals to them.
- Requests for reduced rental pricing, particularly among younger, price-sensitive viewers.
- Requests for extended rental viewing windows for greater flexibility.
- Requests for a simpler user interface and clearer upfront communication of which titles require a rental fee.

Discussion

The findings support the applicability of both theoretical frames adopted in this study. Consistent with the Uses and Gratifications Theory, respondents did not engage with Amazon Prime Video's marketing passively: a large majority reported that influencer promotion and social media content directly shaped their decision to watch specific shows (75.8%, Table 4) and prompted them to watch sooner after seeing a trailer or post (63.9% combined agreement, Table 4). This suggests that Amazon Prime Video's marketing succeeds to the extent that it is experienced by viewers as gratification-relevant content in its own right — entertaining, socially shareable, and personally relevant — rather than as conventional advertising to be filtered out.

The dominance of Instagram as a marketing channel (85.5% recall, Table 3) and the corresponding weakness of television advertising (12.9% recall) is consistent with Ramesh and D'Silva's (2022) finding that targeted digital and social media promotion, rather than traditional advertising, is the primary driver of OTT engagement in India. It also aligns with Rahman's (2021) comparative analysis of Amazon Prime Video's and Disney+'s Instagram strategies, and extends that work by showing the audience-side effect of this channel choice: not merely exposure, but measurable behavioural response.

The Integrated Marketing Communications model helps explain the finding that bundled offers with Amazon's retail ecosystem exert a positive, though comparatively modest, effect on Prime Video interest (51.6% agreement, Table 4). This is consistent with Wayne's (2017) argument that Amazon's content strategy serves its broader retail and subscription ecosystem rather than functioning as a standalone content brand; the present study's Indian respondents appear to experience this cross-ecosystem integration as a mild but real incentive, rather than a decisive

one. The clearest and most consequential finding concerns the rental-based subscription model. Despite high awareness (77.4%), actual use remains low (30.6%, Table 5), and open-ended responses consistently frame the model as creating a sense of being charged twice for content already covered by a paid subscription. This finding extends Sar's (2022) pricing research, which validated consumer willingness-to-pay estimates for Amazon Prime Video's base subscription but did not examine the separate rental layer now embedded within it. It also helps explain the study's finding that 67.7% of respondents would be very likely to switch to a cheaper, ad-supported tier: this preference appears to reflect not only general price sensitivity, documented by Sujit and Mohan (2021) and Parihar and Kant (2021) as a consistent driver of OTT satisfaction, but a specific reaction against a pricing structure perceived as opaque or unfair.

Taken together, these findings suggest that Amazon Prime Video's promotional marketing and its monetisation strategy are currently working somewhat against one another: marketing activity is succeeding in building positive perception and increasing viewing frequency, consistent with the platform's broader IMC strategy, but the rental-based pricing layer risks undermining the goodwill this marketing generates, echoing the reputational-risk dynamic identified by Saldanha (2024) in relation to Amazon Prime Video's content controversies — in both cases, a strategic choice made for commercial or creative reasons carries a cost in subscriber trust that the platform's marketing must then work to offset.

Conclusion

This study set out to examine how Amazon Prime Video's marketing strategies influence viewership behaviour among Indian audiences, with specific attention to the platform's rental-based subscription model. The findings indicate that Amazon Prime Video's marketing strategies — particularly Instagram-based promotion, influencer endorsement, and trailer-driven content discovery — have a measurable and largely positive effect on audience perception, engagement, and binge-watching frequency, consistent with both the Uses and Gratifications Theory and the Integrated Marketing Communications model applied in this study. At the same time, the study identifies a clear point of friction: subscribers are highly aware of, but largely unwilling to pay for, rental-based premium content layered on top of an existing paid subscription, and a substantial majority express willingness to switch to a cheaper, ad-supported alternative if offered. For Amazon Prime Video and comparable OTT platforms, this suggests that continued

investment in social-media-led marketing is likely to sustain audience engagement, but that pricing transparency and a reconsidered approach to rental-based monetisation are equally necessary for sustained subscriber satisfaction and loyalty.

पूर्वोत्तर भारत- सांस्कृतिक संरक्षण, विरासत और पर्यटन

- डा. गुलशन गुप्ता

पूर्वोत्तर की संस्कृति को केवल “जनजातीय संस्कृति” कहना भी इसके व्यापक स्वरूप को सीमित कर देता है। यहाँ जनजातीय समुदायों के साथ अनेक गैर-जनजातीय समुदाय भी रहते हैं और प्रत्येक राज्य के भीतर भी अनेक सांस्कृतिक परंपराएँ मौजूद हैं। अतः “पूर्वोत्तर संस्कृति” को एक एकरूप संस्कृति की बजाय बहुसांस्कृतिक और बहुस्तरीय सांस्कृतिक परिसर के रूप में समझना अधिक उपयुक्त है।

पूर्वोत्तर भारतीय संस्कृति को ऊपरी तौर पर देखें तो विविधता का अनुभव होता है। आठ राज्य, 132 जिले, उनमें रहने वाली अनेकों जातियाँ, 220 से अधिक जनजातियाँ और उप-जनजातियाँ, इतनी ही भाषाएँ, बोलियाँ, उप-बोलियाँ और इन सभी में शामिल सांस्कृतिक विविधता। इतना होने के बावजूद पूर्वोत्तर भारत की सांस्कृतिक एकता का आधार वही नींव है जो पूरे भारत की संस्कृति को बांधे रखती है।

पूर्वोत्तर भारत की संस्कृति

पूर्वोत्तर सदैव से भारत के वैदिक इतिहास से लेकर आधुनिक इतिहास तक की साझा ऐतिहासिक विरासत का महत्वपूर्ण अध्याय रहा है। कई पूर्वोत्तर राज्यों का प्राचीन इतिहास— जैसे असम, (प्राचीन कामरूप और प्रागज्योतिषपुर), अरुणाचल प्रदेश और मणिपुर— महाभारत और रामायण काल से जुड़े रहे हैं। हरि-हर युद्ध (शोणितपुर), रुक्मिणी हरण (अरुणाचल प्रदेश), अर्जुन-चित्रांगदा विवाह (मणिपुर), जैसे अनेकों उदाहरण इसका साक्ष्य प्रस्तुत करते हैं। पौराणिक कथाओं के अनुसार, रुक्मिणी अरुणाचल प्रदेश के इडु-मिशमी जनजाति से थीं। भगवान कृष्ण यहीं से देवी रुक्मिणी को द्वारका ले गए थे। ऐसा माना जाता है कि डिमापुर (नागालैंड) और कछार (असम) का क्षेत्र राजा हिडिम्ब और उनकी बहन हिडिम्बा से संबंधित था। अतः भीम के हिडिम्बा के साथ विवाह का प्रसंग भी पूर्वोत्तर से जुड़ा है।

पूर्वोत्तर भारत की सांस्कृतिक विविधता

पूर्वोत्तर की संस्कृति में अनेक समुदायों और ऐतिहासिक अनुभवों का सम्मिलित योगदान है। यह विविधता इस धारणा को चुनौती देती है कि पूर्वोत्तर की संस्कृति को किसी एक “जनजातीय संस्कृति” के रूप में परिभाषित किया जा सकता है।

राज्य प्रमुख सांस्कृतिक विशेषताएँ

अरुणाचल प्रदेश	अनेक जनजातीय परंपराएँ, बौद्ध प्रभाव, पारंपरिक हस्तशिल्प और प्रकृति-आधारित जीवन
असम	बिहू, सत्र परंपरा, साहित्य, संगीत संस्कृति
मेघालय	खासी, जयंतिया और गारो सांस्कृतिक परंपराएँ
नागालैंड	विभिन्न नगा समुदायों की सांस्कृतिक परंपराएँ, हस्तशिल्प और उत्सव
मिजोरम	मिजो सामुदायिक परंपरा, संगीत और नृत्य
मणिपुर	रासलीला, मैतेई सांस्कृतिक परंपरा, लोकतक क्षेत्र, मार्शल परंपराएँ
त्रिपुरा	त्रिपुरी एवं अन्य समुदायों की परंपराएँ, राजवंशीय और धार्मिक विरासत
सिक्किम	लेपचा, भूटिया और नेपाली सांस्कृतिक परंपराओं का अंतर्संबंध

प्रकृति और संस्कृति का संबंध

पूर्वोत्तर भारतीय संस्कृति का एक महत्वपूर्ण पहलू प्रकृति के साथ गहरा संबंध है। पर्वत, नदियाँ, जंगल, झीलें और कृषि भूमि केवल प्राकृतिक संसाधन नहीं हैं; वे स्थानीय समुदायों की स्मृतियों, विश्वासों, लोककथाओं और आजीविका से भी जुड़े हैं। North Eastern Council के अनुसार यह क्षेत्र Indo-Burma तथा Himalayan biodiversity hotspots से संबंधित है और यहाँ अनेक विशिष्ट वनस्पतियाँ तथा जीव पाए जाते हैं। साथ ही जैव-विविधता पर अनेक प्रकार के दबाव भी मौजूद हैं।

अध्यात्म और कला

पूर्वोत्तर में आध्यात्मिक और दार्शनिक दृष्टि से भी समानता मिलती है। पूरे भारत की तरह पूर्वोत्तर में भी प्रकृति की पूजा (जैसे नदियों, पर्वतों और वनों का सम्मान) और कर्म-सिद्धांत का गहरा महत्व है। मणिपुर में वैष्णव परंपरा और असम में श्रीमंत शंकरदेव द्वारा स्थापित 'सत्र' संस्कृति, अखिल भारतीय भक्ति आंदोलन की ही अभिव्यक्ति हैं।

पूर्वोत्तर के अधिकांश त्योहार जैसे बिहू (असम), बांगला (मेघालय), और नोंगक्रेम प्रकृति और कृषि चक्र पर आधारित हैं। ये अखिल भारतीय फसल उत्सवों (जैसे पोंगल, बैसाखी) की मूल भावना के ही समान हैं।

पूर्वोत्तर के पारंपरिक नृत्य, संगीत और हस्तशिल्प पूरे देश की कलात्मक विरासत का अभिन्न अंग हैं। यहाँ की

समृद्ध सांस्कृतिक पहचान 'एक भारत-श्रेष्ठ भारत' की संकल्पना को साकार करती है पूर्वोत्तर भारत की संस्कृति को आगे बढ़ाने का एक और अहम तरीका है – वहां के विरासत स्थलों का विकास और संरक्षण। 'स्वदेश दर्शन' योजना के तहत पर्यटन मंत्रालय ने पूर्वोत्तर में 16 खास परियोजनाओं को मंजूरी दी है। ये परियोजनाएं क्षेत्र की विरासत, वन्यजीव, आध्यात्मिकता, जनजातीय संस्कृति और एडवेंचर पर्यटन से जुड़ी हैं। ₹1,337.63 करोड़ की राशि से ये 16 परियोजनाएँ स्वीकृत की गई थीं। इन परियोजनाओं से पूर्वोत्तर के पर्यटन विकास में प्राकृतिक भू-दृश्य, स्थानीय संस्कृति और क्षेत्रीय पर्यटन अनुभवों को एक साथ देखने का प्रयास किया गया है। इन परियोजनाओं की प्रकृति यह स्पष्ट करती है कि पूर्वोत्तर में पर्यटन विकास को केवल प्राकृतिक सौंदर्य के उपभोग तक सीमित नहीं रखा गया, बल्कि उसे प्राकृतिक, सांस्कृतिक, आध्यात्मिक, ऐतिहासिक और साहसिक पर्यटन के विभिन्न आयामों से जोड़ने का प्रयास किया गया। उदाहरण के लिए, सरकारी अभिलेखों में असम के लिए Wildlife Circuit के अंतर्गत मानस, पोबितोरा, नामेरी, काजीरंगा और डिब्रू-सैखोवा जैसे क्षेत्रों के विकास तथा Heritage Circuit के अंतर्गत तेजपुर-माजुली-शिवसागर क्षेत्र के विकास का उल्लेख मिलता है। मणिपुर में इम्फाल-खोंगजोम क्षेत्र के पर्यटन विकास और आध्यात्मिक पर्यटन से संबंधित परियोजनाएँ भी स्वीकृत की गई थीं।

यहाँ यह समझना आवश्यक है कि पर्यटन विकास और सांस्कृतिक संरक्षण एक-दूसरे के पूरक हो सकते हैं, लेकिन दोनों स्वतः समानार्थी नहीं हैं। किसी विरासत स्थल को पर्यटक स्थल में बदल देना मात्र सांस्कृतिक संरक्षण नहीं माना जा सकता। वास्तविक सांस्कृतिक संरक्षण तभी संभव है जब स्थानीय समुदाय की भागीदारी, स्थानीय ज्ञान, पारंपरिक वास्तु, भाषा, कला, धार्मिक संवेदनशीलता और सांस्कृतिक स्वायत्तता को विकास की प्रक्रिया में उचित स्थान मिले।

उदाहरण के लिए, किसी जनजातीय समुदाय की पारंपरिक बुनाई, लोकनृत्य, संगीत, भोजन, वास्तुकला या कृषि-परंपरा को केवल पर्यटन आकर्षण के रूप में प्रस्तुत करने के बजाय उसके सामाजिक और ऐतिहासिक संदर्भ को भी पर्यटकों के सामने रखा जाना चाहिए। इससे संस्कृति का 'प्रदर्शन' मात्र नहीं होगा, बल्कि उसके पीछे मौजूद सामुदायिक स्मृति और जीवन-दर्शन भी सामने आएगा।

इस दृष्टि से पूर्वोत्तर भारत में Community-Based Cultural Tourism की अवधारणा विशेष रूप से महत्वपूर्ण हो सकती है। स्थानीय समुदायों को केवल पर्यटकों के लिए सांस्कृतिक प्रदर्शन करने वाले समूह के रूप में देखने के बजाय उन्हें विरासत के संरक्षक, ज्ञान-धारक और निर्णय-प्रक्रिया के सहभागी के रूप में स्वीकार किया जाना चाहिए। इससे पर्यटन से होने वाला आर्थिक लाभ भी स्थानीय स्तर पर वितरित हो सकता है और सांस्कृतिक परंपराओं के संरक्षण के लिए प्रोत्साहन पैदा हो सकता है।

पूर्वोत्तर के संदर्भ में यह विशेष रूप से महत्वपूर्ण है क्योंकि यहाँ संस्कृति और प्रकृति के बीच संबंध अत्यंत गहरा है। जंगल, नदियाँ, पहाड़, झीलें और कृषि-आधारित जीवन स्थानीय समुदायों की सामाजिक स्मृति, लोकविश्वास और आजीविका से जुड़े हुए हैं। इसलिए विरासत संरक्षण की नीति को केवल निर्मित विरासत तक सीमित रखने के बजाय प्राकृतिक और सांस्कृतिक विरासत के समेकित संरक्षण की दिशा में आगे बढ़ना आवश्यक है।

अतः पूर्वोत्तर भारत की संस्कृति को आगे बढ़ाने के लिए विरासत स्थलों का विकास तभी सार्थक होगा जब विकास का उद्देश्य केवल पर्यटकों की संख्या बढ़ाना न होकर स्थानीय संस्कृति की गरिमा, समुदाय की भागीदारी, पर्यावरणीय संतुलन और सांस्कृतिक निरंतरता को बनाए रखना हो। इस दृष्टिकोण से पर्यटन पूर्वोत्तर भारत की संस्कृति को केवल देश और दुनिया के सामने प्रस्तुत करने का माध्यम नहीं, बल्कि स्वयं उस संस्कृति के संरक्षण और पुनर्जीवन का साधन भी बन सकता है।

भारतीय सिनेमा में परिवार: फिल्म बागवान के सन्दर्भ में

- आदित्य अवस्थी

- डा. उमेश चंद्र पाठक

नयी शताब्दी के बॉलीवुड सिनेमा में परिवार के चित्रण में एक नया रूख उभर कर सामने आता है। भारतीय सिनेमा और विशेष कर हिंदी सिनेमा में परिवार की हमेशा महत्वपूर्ण भूमिका रही है। एक समय था जब कि सिनेमा संयुक्त परिवार के विचार का समर्थन करता था और बदलती परिस्थितियों में उसकी समस्याओं के समाधान के प्रयासों और चुनौतियों को उभारता था। फिर एक ऐसी फिल्मों का दौर आया जिसमें मां की सत्ता और महत्व को प्राथमिकता दी गई। मदर इंडिया जैसी फिल्में बनीं जो कि आल टाइम ग्रेट फिल्मों में से एक गिनी जाती है। कुछ ऐसी फिल्में भी बनीं जिसमें पिता की सत्ता को महत्व दिया गया है।

इसके बाद पारिवारिक विभेदन यानी टकराव और बिखराव को चित्रित किया गया। इस दौरान एकल परिवार और बिखराव पर आधारित फिल्में बनाने का सिलसिला आया। एकल माता और पिता का चरित्र चित्रण करने वाली फिल्में आईं।

अस्सी के दशक से पारिवारिक फिल्मों के प्रति भारतीय सिनेमा का रुझान कम होना शुरू हुआ। 90 का दशक हिंसा और सेक्स को जहां प्रमुखता से दर्शाता है वहीं मिलीनियम ईयर दो हजार के बाद एक प्रकार से संयुक्त परिवार का हिंदी सिनेमा में लोप प्रायः हो जाता है। भारतीय समाज की इकाई परिवार के स्थिति इन वर्षों में लगातार बदली है। संयुक्त से एकल परिवार की पृवृत्ति बढ़ती रही और वर्तमान में यह एकल परिवार के अंदर भी सेल्फ सेंटरड यानी स्व केन्द्रित होकर रह गई है। परिवार की इकाई से निकल कर लिव इन रिलेशनशिप और समलैंगिक संबंधों तक को समाज में आंशिक रूप से स्वीकार करना आरम्भ कर दिया है। साहित्य की तरह सिनेमा भी समाज का आईना होता है साहित्य और सिनेमा एक दूसरे को परस्पर प्रभावित करते हैं। सेलोलाइट के पर्दे पर घटित घटनाओं का जहां समाज अनुकरण करता है वहीं सिनेमा समाज में घटने वाली घटनाओं को अपने माध्यम से नाटकीय रूप से चित्रित करने का प्रयास करता है।

साठ से सत्तर का दशक हिंदी सिनेमा का स्वर्ण काल कहा जा सकता है जब सबसे ज्यादा फोकस सामाजिक नैतिक और पारिवारिक मूल्यों पर हुआ करता था। पिछले इन दशकों में 2003 में आई अमिताभ बच्चन अभिनीत फिल्म बागवान को अपवाद के रूप में रखा जा सकता है। फिल्म का शीर्षक ही अपने आप में बहुत कुछ बता देता है। इस प्रकार एक माली बाग के सभी पेड़ पौधों का ध्यान रखता है देख रेख करता है उनके

विकास के लिए हर जरूरतें पूरा करता है। परिवार का मुखिया भी ऐसे ही एक बाग का माली जैसा है जो परिवार के सभी सदस्यों का ख्याल रखता है और उनके विकास के लिए निरंतर प्रयास करता रहता है। परिवार का विकास परिवार के मुखिया के सोच पर निर्भर है। उसके मूल्य और उसके प्रयास और उसके भविष्य की योजना पर परिवार की उन्नति टिकी होती है। ऐसे में परिवार का मुखिया एक गंभीर और जिम्मेदार व्यक्तित्व होता है। जीवन दर्शन का एक सामान्य नियम है एक देता है और दूसरा पाता है। देने वाला सदैव बड़ा होता है जिस प्रकार “वृक्ष न कभउ फल चखे नदी न पीवे नीर परमारथ के कारणे साधुन धरा शरीर रहीम राज के इस दोहे का अर्थ है & “पेड़ स्वयं फल नहीं खाता परन्तु दूसरों के लिए सदैव फल देता है। नदी स्वयं जल नहीं पीती। इसी प्रकार भले लोग दूसरों के कल्याण के लिए ही काम करते हैं। परिवार का मुखिय भी उसी पेड़ के समान होता है जिसे सदैव ही परिवार की चिंता होती है। फिल्म का कथानक टूटते पारिवारिक मूल्यों और रिश्तों के स्वार्थपरता और परिवार के छद्म सम्मान की सामाजिक प्रतिष्ठा पर आधारित है। कथानक वस्तुतः आधुनिक परिवार खास कर नगरीय परिवारों की हकीकत से रूबरू कराता है। जहां व्यक्ति समस्ति पर लगातार भारी होता जा रहा है। फिल्म में एक पिता अपनी समस्त इच्छाओं का त्याग कर के अपनी संतानों की उज्ज्वल भविष्य के लिए यथा संभव प्रयास करता है। इस प्रक्रिया में वह स्वयं के भविष्य का चिंतन भूल जाता है। अपने दिये संस्कारों और संतानों पर अगाध विश्वास उसे जीवन के आने वाले हर छोटे बड़े दुश्चारियों से लड़ने की शक्ति देता है।

फिल्म के कथानक का केन्द्र बिंदु परिवार है। परिवार के सभी सदस्य मिल कर ही परिवार को पूर्ण करते हैं। नयी और पुरानी पीढ़ी के बीच आवश्यक सामंजस्य भी कथानक के विशेषता है। आधुनिक तकनीक और विकास ने संचार के न जाने कितने साधन सुलभ करा दिये हैं फिर भी इंसान का इंसान से संचार आज भी वास्तव में भावना से ही संभव है। रिश्तों में भावुकता परिपक्वता परस्पर संबंध और जिम्मेदारी का अहसास कितने जरूरी है इस पर फिल्म के कथानक में काफी जोर दिया गया है। “परहित सरिस धर्म नहीं भाई सो का जानै पीर पराई” के भाव का भी यथा स्थान कथानक में महत्व दिया गया है। परेश रावल और उनकी पत्नी का चरित्र फिल्म में पराए दर्द को महसूस करने वाले इंसान का है। यह निसंतान दम्पति संतानों की सच्चाई और उनके द्वारा किये गए मां बाप की प्रताड़ना से दुखी हो कर संतान न होने पर भी संतोष प्रकट करता है और ईश्वर को धन्यवाद देता है। पूरे कथानक में यह दृश्य अपने आप में संतान और परिवार से जुड़े अनेक प्रश्नों का उत्तर देता प्रतीत होता है। परिवार के इकाई के रूप में सदस्य जब परिवार के मुखिया और पारिवारिक नियमों की अवहेलना करने लगते हैं पारिवारिक मूल्यों का बिखराव होने लगता है वहीं पारिवारिक विघटन का आरंभ हो जाता है।

परिवार को केन्द्र बिंदु में रख कर रिश्तों के यथार्थ रूप के ताने बाने से रचा फिल्म का कथानक काफी प्रभावशाली और सत्य के निकट प्रतीत होता है।

कहानी का चरमोत्कर्ष दुखद है यह काफी मुश्किल होता है जब आप का एक सपना पूरा हो और वही सपना आपके दूसरे सपने टूटने का कारण बन जाए। पहला सपना उसकी संतानों की सफलता होती है जो पूरी होती है और दूसरा सपना उसका विश्वास होता है कि मेरी संतान बुढ़ापे में मुझे सुख और सम्मान देंगे। जीवन की इस मृग मरीचिका के टूटने से पिता काफी आहत होता है और यहीं से उसके यथार्थवादी व्यक्तित्व का जन्म होता है।

पश्चिमी दार्शनिक मैकटागार्ट का कथन है कि गुड एंड इविल्स आर एवरीवेयर इविन विद इन असा। संसार में भी अच्छे और बुरे व्यक्ति दोनों की मौजूद हैं। समाजिक संतुलन इन्हीं से बनता है। फिल्म में भी मुख्य अभिनेता चरित्र को एक अच्छे व्यक्ति के रूप में गुजराती रेस्तरां वाला मिलता है जो उसके पारिवारिक कष्ट को समझ कर उसे काम करने के लिए जगह दे देता है। मानवीय दृष्टिकोण से मनुष्य को मनुष्य का कष्ट यदि समझ में आ रहा है तभी तक वह मनुष्य है। वर्तमान में हम सब इस बात को पीछे छोड़ते हुए केवल स्वयं के कष्टों की बात करते हैं। क्या फर्क पड़ता है का जुमला अक्सर सुनने को मिलता है। जब स्वयं के साथ कुछ बुरा घटित होता है तो अहसास होता है कि 'कितना फर्क पड़ता है।' सामाजिक स्वीकृति की चाह में व्यक्ति परिवार की अवहेलना करने लगता है। जब कि परिवार एक स्थायी व्यवस्था है हमें घूम फिर कर वापस वहीं आना पड़ता है। अपने अच्छे बुरे की पहली पहचान वहीं होती है। बच्चे की पहली पाठशाला परिवार है। परिवार से दिये हुए मूल्य ही व्यक्तित्व की पहचान बनते हैं। इस प्रकार जड़ों से कट कर कोई भी पौधा हरा नहीं रहता। विकास के नाम पर परिवार से कट कर भी व्यक्ति अपने वास्तविक पहचान और प्राकृतिक विकास को प्राप्त नहीं कर सकता। परिवार से मिले मूल्य ताउम्र आप की पहचान का हिस्सा बनते हैं। आप के व्यक्तित्व के अधिकांश पहलू परिवार से मिले इन्हीं आधारभूत मूल्यों से विकसित होते हैं। फिल्म बागवान के कथानक में कमोवेश कुछ ऐसा ही चित्रण है। आगे बढ़ने की होड़ में संताने अपने मां बाप को छोड़ देते हैं।

नयी सदी के सच को और बुजुर्गों के आत्मनिर्भरता के महत्व को जानने के बाद फिल्म का मुख्य चरित्र आर्थिक जगत के यथार्थ के बीच स्वयं को समायोजित करने का प्रयास करता है। इसी क्रम में कई नाटकीय घटनाओं के बीच वह अपनी टूटे टाइपराइटर से अपनी आत्मकथा को एक किताब का आकार देता है। किताब छपती है, और देखते देखते उसे अंतरराष्ट्रीय पुरस्कार मिलता है। कल का लाचार वृद्ध पिता एक झटके में सेलेब्रटी हो जाता है। उसकी इस सच्चाई को जानने के बाद उसे ठुकरा चुके सभी संतान उसके पास आते हैं। यह दृश्य वास्तव में रिश्तों

में बढ़ चुके भयानक स्वार्थ पर एक व्यंग्य है। वर्तमान समाज की सच्चाई समझ चुके बागवान के लेखक उस वृद्ध पिता के मुख से अंत में दिया गया संदेश वास्तव में फिल्म का सार है। हर इंसान को अपने बुढ़ापे की व्यवस्था पूर्व निश्चित करनी होगी। आज का व्यक्ति वादी परिवार और परिवार के सदस्य आप से तभी तक जुड़े हैं जब तक उनकी आवश्यकताएं आप से पूरी हो रही हैं। रिश्तों के पीछे पैसे और जरूरतें हैं। सच तो यह है कि सारे रिश्ते ही पैसे से हैं।

बागवान फिल्म केवल फिल्म नहीं है बल्कि आईना है तेजी से विकसित होते भारतीय समाज का जहां जिंदगी में सब कुछ पा लेने की होड़ में रिश्ते नाते और इन सब से बढ़ कर परिवार कहीं बहुत पीछे छूटता जा रहा है।

नाट्यशास्त्र: भारतीय ज्ञान परंपरा और संचार का शाश्वत विमर्श

- अमित शर्मा

यूनेस्को ने इस बार विश्व धरोहर दिवस पर भारत के आदिग्रंथ श्रीमद्भगवद्गीता और भरत मुनि रचित नाट्य शास्त्र को अपने स्मृतिकोष में शामिल किया है। यूनेस्को के विश्व स्मृति रजिस्टर में विश्व की महत्वपूर्ण पांडुलिपियों को शामिल करने का उद्देश्य इन धरोहरों को संरक्षित रखना और इनमें दर्ज ज्ञान को दुनिया के सामने लाना है। ऐसे में भारत की शाश्वत ज्ञान परंपरा और समृद्ध सांस्कृतिक विरासत की महत्ता एक बार फिर वैश्विक स्तर पर स्थापित हुई है।

श्रीमद्भगवद्गीता आदिग्रंथ महाभारत के भीष्मपर्व का अंग है। इसमें वर्णित निष्काम कर्म को आधुनिक मैनेजमेंट गुरु भी जीवन जीने की कला का आधारमंत्र मानते हैं। गीता के ज्ञान की व्याख्या हमारे समाज में काफी प्रचलित रही है। लेकिन भरत मुनि रचित नाट्यशास्त्र के बारे में आमजन उतना परिचित नहीं हैं। जबकि इसे आधुनिक संचार सिद्धांतों का प्रेरणा आधार माना जाए तो ये अतिशयोक्ति नहीं होगा।

भरत मुनि रचित नाट्यशास्त्र को भारत की ललित कलाओं का प्राचीन ग्रंथ माना जाता है। भरत मुनि लगभग दूसरी शताब्दी ईसा पूर्व के एक महान ऋषि और विद्वान थे। संस्कृत में रचित इनका ग्रंथ 'नाट्यशास्त्र' कुल 36 अध्यायों में विभाजित है। इसमें नाट्यकला के सभी अंगों - अभिनय, संवाद, रस, संगीत, नृत्य, रंगमंच की संरचना, भावों की अभिव्यक्ति तथा दर्शकों पर प्रभाव डालने की विधियों का विस्तार से वर्णन है। भरत मुनि ने नाट्यकला को 'पंचम वेद' की संज्ञा दी है - एक ऐसा माध्यम जो वेदों के ज्ञान को आम जन तक पहुंचाने में सक्षम है। भरत मुनि ने नाटक को "लोक शिक्षाय कामार्थम्" अर्थात् लोक(आमजन) को शिक्षा और आनंद देने वाला माध्यम बताया है। यह परिभाषा नाट्य को एक प्रभावी संचार साधन के रूप में भी स्थापित करती है। दरअसल भरत मुनि का नाट्यशास्त्र केवल प्राचीन नाट्यकला का दस्तावेज नहीं, बल्कि एक अत्यंत आधुनिक और वैज्ञानिक दृष्टिकोण वाला संचार-सिद्धांत भी है।

संचार (Communication) आधुनिक समाज का सबसे महत्वपूर्ण तत्व है। संचार क्रांति ने हमारी पूरी दुनिया ही बदल दी है। अखबार, रेडियो, टीवी से लेकर डिजिटल मीडिया तक - हम संचार माध्यमों से घिरे हैं।

क्या हैं संचार?

संचार को समझने के लिए कई संचार सिद्धांत प्रतिपादित किए गए हैं। इनमें विदेशी संचार

सिद्धांत और भारतीय संचार सिद्धांत दोनों शामिल हैं। परंतु दोनों में कुछ आधारभूत विभिन्नताएं दिखती हैं। विदेशी संचार सिद्धांतों का विकास आधुनिक पश्चिमी समाज की राजनीतिक और सामाजिक परिस्थितियों को ध्यान में रखते हुए हुआ है। इतना जोर संदेश के प्रसारण की प्रक्रिया और माध्यम के प्रभाव पर ज्यादा रहता है। वहीं भारतीय संचार सिद्धांत संदेश को इसके मूल रूप में समझने और इस समझदारी को विकसित करने पर जोर देते हैं। भारतीय संचार सिद्धांत दर्शन, अनुभूति और सांस्कृतिक अनुभव पर आधारित हैं। भारतीय संचार परंपरा में संदेश सिर्फ जानकारी भर नहीं है बल्कि भाव और अनुभव का संचार है। संचार का उद्देश्य सिर्फ बताना नहीं बल्कि अनुभव कराना है। भारत की प्राचीन सांस्कृतिक धरोहर में भरत मुनि रचित नाट्यशास्त्र एक ऐसा ग्रंथ है, जो इसी भावपूर्ण संप्रेषण की महत्ता प्रतिपादित करता है। यह न केवल रंगमंच और नाट्यकला का वैज्ञानिक दस्तावेज है, बल्कि संचार के सिद्धांतों का भी गहन विश्लेषण प्रस्तुत करता है। यह ग्रंथ आज भी नाट्य, सिनेमा, मीडिया और संवाद प्रक्रिया के अध्ययन में अत्यंत उपयोगी सिद्ध होता है। कई विद्वान मानते हैं कि इसी पूर्वी दर्शन और कला शास्त्र ने अप्रत्यक्ष रूप से संचार की वैश्विक विचारधारा को भी प्रभावित किया है। कई विद्वानों का तर्क है कि नाट्यशास्त्र के रस सिद्धांत में संचार का जो गहराईपूर्ण विश्लेषण है, वो कई आधुनिक सिद्धांतों से अधिक विकसित है।

‘नाट्यशास्त्र’ में समानता के सूत्र

कई आधुनिक संचार मॉडलों में समानता के सूत्र भरत मुनि के नाट्यशास्त्र में साफ दिखाई देते हैं। संचार प्रक्रिया को समझने के लिए ‘शैनन-वीवर मॉडल’ का पश्चिमी संचार मॉडलों में प्रमुख स्थान है। इसे अमेरिका के वैज्ञानिकों क्लाउड शैनन और वैरेन वीवर ने 1948-49 में प्रतिपादित किया था। इस संचार मॉडल ने बाद के कई पश्चिमी संचार सिद्धांतों को प्रभावित किया। इसमें प्रतिपादित किया गया है कि संचार एक प्रक्रिया है जिसमें प्रेषक (Sender), संदेश (Message), माध्यम (Medium), ग्रहणकर्ता (Receiver), और अभिपुष्टि (Feedback) शामिल होते हैं। आश्चर्य की बात है कि नाट्यशास्त्र में यह प्रक्रिया हजारों वर्ष पहले ही व्याख्यायित की जा चुकी थी। बल्कि भरत मुनि का संचार का दृष्टिकोण समग्र (holistic) है जिसमें व्यक्ति, समाज, भावनाएँ और भाषा – सभी शामिल होते हैं।

इसी तरह सन् 1960 में अमेरिका के विद्वान डेविड बर्लो ने एक मॉडल प्रतिपादित किया जिसे बर्लो एसएमसीआर मॉडल (Berlo's SMCR Model) के नाम से जाना जाता है। बर्लो संचार प्रक्रिया में प्रेषक(Sender), संदेश (Message), माध्यम (Channel), ग्रहणकर्ता

(Receiver) के तत्वों को महत्वपूर्ण मानते हैं। इसके साथ ही बलों संदेश के प्रभावशाली संप्रेषण की बात कहते हैं। भरत मुनि के नाट्यशास्त्र में संप्रेषण के ये सभी तत्व शामिल हैं। नाट्यशास्त्र के अनुसार संचार का अंतिम उद्देश्य रसों की अभिव्यक्ति और संदेश का भावात्मक अनुभव है। नाट्यशास्त्र बताता है कि संदेश की सफलता तभी है जब वो दर्शकों के अंतर्मन को छू ले।

इसी तरह संकेत-प्रतीक आधारित संचार मॉडल (Semiotic Model) दर्शाता है कि संचार, संकेतों और प्रतीकों के माध्यम से भी होता है। जैसे - रंगों के अलग-अलग अर्थ होते हैं। शारीरिक मुद्राओं से संकेतों का आदान प्रदान हो जाता है। वेशभूषा से सामाजिक वर्ग या मनोदशा का प्रदर्शन होता है। भरत मुनि रचित नाट्यशास्त्र का सबसे प्रसिद्ध और महत्वपूर्ण योगदान है – रस सिद्धांत और भाव संप्रेषण। भरत मुनि ने कहा है कि भावों के संयोग से रस की उत्पत्ति होती है। रस वो भाव है जो दर्शकों में उत्पन्न होता है, जैसे- करुणा, हास्य, रौद्र, शांत आदि। कलाकार अपनी वाणी, मुखमुद्रा, शारीरिक हाव-भाव आदि से इन रसों को दर्शकों तक पहुंचाता है। इस प्रकार रस केवल सौंदर्यबोध नहीं, बल्कि एक सशक्त संचार प्रक्रिया है। यहां नाट्यशास्त्र एक अत्यंत संवेदनशील संचार प्रक्रिया का वर्णन करता है जहां शब्दों से अधिक भावनाओं की भूमिका होती है। दर्शक कलाकार के साथ आत्मीयता अनुभव करते हैं और उसी भाव का अनुभव करते हैं – यही सफल संचार का मूल तत्व है। इसी तरह नाट्यशास्त्र में भरत मुनि ने अभिनय के भी चार प्रकार बताए हैं जो मूलतः संचार के विभिन्न माध्यम की तरह कार्य करते हैं। भरत मुनि ने वाचिक, आंगिक, सात्त्विक और आहार्य अभिनय के माध्यम से प्रतीकों और संकेतों को विस्तार से समझाया है। पहला, वाचिक अभिनय जिसमें संवाद और उच्चारण से विचारों का संप्रेषण किया जाता है। यह आज के आडियो माध्यम जैसे रेडियो, पॉडकास्ट आदि की तरह है। दूसरा, आंगिक अभिनय जिसमें शारीरिक गति, इशारों और मुद्राओं से संप्रेषण होता है। यह नॉन-वर्बल कम्यूनिकेशन का आधार है। तीसरा, सात्त्विक अभिनय जिसमें आंतरिक भावनाओं की अभिव्यक्ति के लिए अंतर्मन के प्रतीकों का सहारा लिया जाता है। जैसे आंखों में आंसू, भय का कंपन, हृदय का धड़कना आदि दिखाते हैं कि संचार सिर्फ बाह्य नहीं बल्कि अंतर्मन से भी होता है। चौथा, आहार्य अभिनय जिसमें वेशभूषा, मंच-सज्जा आदि शामिल है। यह दृश्य प्रभाव के माध्यम से संचार है। आधुनिक फिल्मों में सेट-डिजाइन और कास्ट्यूम का इस्तेमाल कर प्रभावी संचार स्थापित किया जाता है।

इसी तरह एक प्रसिद्ध पश्चिमी संचार सिद्धांत है – उपयोग और संतुष्टि सिद्धांत (Uses and Gratification Theory)। इसके अनुसार लोग सक्रिय रूप से मीडिया का चयन करते हैं और इसका उपयोग अपनी जरूरतों को पूरा कर संतुष्टि प्राप्त करने के लिए करते हैं। इन जरूरतों के

चार प्रमुख तत्व हैं – मनोरंजन, सूचना, भावनात्मक राहत, सामाजिक जुड़ाव। भरतमुनि का नाट्यशास्त्र भी कहता है कि नाटक का उद्देश्य सिर्फ मनोरंजन नहीं बल्कि मूल्यपरक शिक्षा और सूचना भी है। इसके साथ ही नाटक से दर्शक भावनात्मक जुड़ाव महसूस करते हैं और साथ ही ये सामाजिक जुड़ाव की भी वजह बनता है। इस तरह यूजेस एंड ग्रेटिफिकेशन थ्योरी के चारों तत्व भरत मुनि के नाट्यशास्त्र में पहले से निहित हैं।

भरत मुनि का नाट्यशास्त्र न केवल भारतीय रंगमंच की नींव है, बल्कि इसकी गणना संचार विज्ञान के सर्वप्रथम और प्रमुख ग्रंथ के रूप में भी की जा सकती है। यह भारत में संचार सिद्धांतों की नींव रखने वाला ग्रंथ है। इसमें संचार की वैज्ञानिक और कलात्मक विधियों को जिस प्रकार से प्रस्तुत किया गया है, वह आज के आधुनिक संचार माध्यमों के लिए भी मार्गदर्शक है। यह एक समृद्ध, संवेदनशील और बहुआयामी संचार प्रक्रिया है, जिसे आधुनिक तकनीक और मीडिया माध्यमों में भी अपनाया जा रहा है।

इस तरह भरत मुनि का नाट्यशास्त्र भारत के शाश्वत ज्ञान का प्रतीक है। यह भारत की सांस्कृतिक धरोहर होने के साथ-साथ नाट्यकला और वैश्विक संचार साहित्य की भी एक अमूल्य निधि है। यूनेस्को ने इसे विश्व स्मृति रजिस्टर में दाखिल कर इसी मान्यता की पुष्टि की है।
