REPORT

INDUSTRIAL VISIT TO YAKULT DANONE INDIA PVT. LTD.

Date: September 17, 2026

Timings: 11 am onwards

Venue: Yakult Danone India Plant, Sonipat

No. of Participants: 37

Organized by: Training and Placement Cell, Department of Economics, Maharaja Agrasen Institute of Management Studies (MAIMS)

Faculty Coordinator: Ms. Kamna Vaid, Training and Placement Officer, Economics

The Department of Economics and the Training and Placement Cell (TPC) of Maharaja Agrasen Institute of Management Studies (MAIMS) organised an industrial visit to the Yakult Danone India Plant, Sonipat, on 17 September 2026. The visit provided students with an opportunity to understand the manufacturing process of Yakult and observe how the products are manufactured, packaged, and prepared for distribution. The visit also helped students connect their theoretical learning with practical industrial processes.

Upon arrival, the students were welcomed at the plant, where a welcome board displaying the college's name was placed. The visit introduced students to the company, its products, and its manufacturing operations.

A short orientation session was conducted to introduce the students to Yakult, its products, and the company. During the session, students were also served Yakult and biscuits. At the end of the orientation, students received a certificate of appreciation along with an envelope.

After the orientation session, the students proceeded for the manufacturing tour. They were able to see the process through which Yakult is made and also observe how the Yakult bottles are manufactured and packaged. Seeing the complete process in person made the visit particularly informative and helped students understand the practical side of manufacturing operations.

After completing the manufacturing tour, the students went downstairs and clicked a group photograph. There was also an option for students to purchase Yakult products from the plant. Students were also provided with a feedback form. Three students volunteered to fill out the form, and after submitting their feedback, they were given a large number of Yakult bottles free of cost. The visit concluded with more group photographs. An Instagram-themed photo stand/poster was also available, allowing students to stand behind it and take pictures.

Conclusion

The industrial visit to the Yakult Danone India Plant, Sonipat, was a useful and informative experience for the students of MAIMS. It provided an opportunity to observe the actual manufacturing process of Yakult, including the manufacturing and packaging of its bottles, rather than learning about the process only through theoretical study. The orientation session, manufacturing tour, feedback activity, and group photographs made the visit engaging as well as educational. Overall, the visit helped students gain practical exposure to an industrial environment and develop a better understanding of how manufacturing processes are carried out in practice.
